CERTAIN CONVENTIONS, USE OF FINANCIAL INFORMATION AND MARKET DATA AND CURRENCY OF PRESENTATION

Certain Conventions

In this Draft Red Herring Prospectus, the terms “we”, “us”, “our”, the “Company”, “our Company”, “Heranba Industries Limited” and “HIL”, unless the context otherwise indicates or implies, refers to Heranba Industries Limited.

Page Numbers

Unless otherwise stated, all references to page numbers in this Draft Red Herring Prospectus are to page numbers of this Draft Red Herring Prospectus.

Financial Data

Unless the context requires otherwise, the financial information in this Draft Red Herring Prospectus is derived from our Restated Ind AS Summary Statements for Fiscal Years 2018, 2017 and 2016 and the Restated Indian GAAP Summary Statements for the Fiscal Years 2015 and 2014.

On February 16, 2015, the Ministry of Corporate Affairs, Government of India (“MCA”) issued the Ind AS Rules for the purpose of enacting changes to Indian GAAP that are intended to align Indian GAAP further with IFRS. The Ind AS Rules provide that the financial statements of the companies to which they apply shall be prepared in accordance with Ind AS. Further, SEBI issued a circular (no. SEBI/HO/CFD/DIL/CIR/P/2016/47) dated March 31, 2016, which provides certain clarifications on the accounting framework to be applied by issuer companies filing draft offer documents with it. We have transitioned to the Ind AS accounting standards with effect from April 1, 2016 for the purpose of inclusion in the Draft red Herring Prospectus.

Indian GAAP and Ind AS differ from accounting principles with which prospective investors may be familiar in other countries, including International Financial Reporting Standards (“IFRS”) and the Generally Accepted Accounting Principles in the United States of America (“U.S. GAAP”). Accordingly, the degree to which the Restated Financial Statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting policies and practices. Any reliance by persons not familiar with Indian GAAP, Ind AS, the Companies Act, the SEBI ICDR Regulations and practices on the financial disclosures presented in this Draft Red Herring Prospectus should accordingly be limited. We have not attempted to quantify the impact of the IFRS or the U.S. GAAP on the Restated Financial Statements included in this Draft Red Herring Prospectus, nor have we provided a reconciliation of our Restated Financial Statements to those under the US GAAP or the IFRS and we urge you to consult your own advisors regarding such differences and their impact on our financial statements.

Our Company’s fiscal year commences on April 1 of each year and ends on March 31 of the next year. Accordingly, all references to a particular fiscal year (referred to herein as “Fiscal”, “Fiscal Year” or “FY”) are to the 12 months period ended March 31 of that particular year, unless otherwise specified.

Unless otherwise stated, all the figures in this Draft Red Herring Prospectus have been presented in lakhs or in whole numbers wherever required. One lakh represents 1,00,000. Certain figures contained in this Draft Red Herring Prospectus, including our financial statements, have been subject to rounding-off adjustments. All decimals have been rounded off to two decimal points. In this Draft Red Herring Prospectus, any discrepancies in any table between the sums of the amounts listed in the table and totals are due to rounding off. However, where any figures that may have been sourced from third-party industry sources are rounded off to other than two decimal points in their respective sources, such figures appear in this Draft Red Herring Prospectus as rounded-off to such number of decimal points as provided in such respective sources.

Currency and units of presentation

In this Draft Red Herring Prospectus, unless the context otherwise requires, all references to (a) ‘Rupees’ or ‘₹’ or ‘Rs.’ or ‘INR’ are to Indian rupees, the official currency of the Republic of India; (b) ‘US Dollars’ or ‘US\$’ or ‘USD’ or ‘\$’ are to United States Dollars, the official currency of the United States of America. All references to the word ‘Lakh’ or ‘Lakhs’ or ‘Lac’ or ‘Lacs’, means ‘One hundred thousand’ and the word ‘Million’ means ‘Ten lakhs’ and the word ‘Crore’ means ‘Ten Million’ and the word ‘Billion’ means ‘One thousand Million’. Any percentage amounts, as set forth in “Risk Factors”, “Our Business”, “Management’s Discussion and Analysis of Financial Conditions and Results of

Operation" and elsewhere in this Draft Red Herring Prospectus, unless otherwise indicated, have been calculated based on our Restated Financial Statements.

In accordance with the SEBI (ICDR) Regulations, "*Basis for the Offer Price*" on page 80 includes information relating to our peer group companies. Such information has been derived from publicly available sources, and neither we, nor the BRLM have independently verified such information.

Although, our Company believes that industry data used in this Draft Red Herring Prospectus is reliable, it has not been independently verified. Further, the extent to which the industry and market data presented in this Draft Red Herring Prospectus is meaningful depends on the reader's familiarity with and understanding of, the methodologies used in compiling such data. Our company has paid Rs. 1690.90 lakhs till September 28, 2018. The matter is pending. For further details, please refer to section titled "Outstanding Litigation and Material Developments" beginning on page 253 of this Draft Red Herring Prospectus.

3. *One of our Promoter, Raghuram K. Shetty was directed not to buy, sell or deal in the securities of Alka Securities Limited in any manner.*

Shetty, 2nd level entity, not to buy, sell or deal in the securities of Alka Securities Limited in any manner, till further directions in this regard (the "Interim Order"). 4. *We require to obtain, maintain and/or renew certain registrations, approvals, licenses and permission in ordinary course of our business, and if we fail to do so, in a timely manner or at all, we may be unable to fully or partially operate our businesses and our results of operations may be adversely affected.*

We require certain approvals, licenses, registrations and permissions for our operations. For further details, please refer to section titled "Government and Other Approvals" beginning on page 261 of this Draft Red Herring Prospectus. While, we believe we will be able to obtain, maintain and renew such approvals or permits as required, there can be no assurance that we can do so in the timeframes anticipated by us, or at all. If we fail to obtain, maintain or renew any of these approvals or permits in a timely manner or at all, our operations and expansion plans may be interrupted, which could adversely affect our growth strategy, business and results of operations. Furthermore, our approvals and permits are subject to numerous conditions, some of which are onerous and require us to make substantial expenditures. If we fail to comply or a regulator alleges that we have not complied with these conditions, our business and results of operations could be adversely affected.

5. Our Company had negative cash flows in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

(₹ in lakhs)			
Cash flow from	March 31, 2018	March 31, 2017	March 31, 2016
Investing activities	(2,468.62)	(602.20)	(724.42)
Financing activities	(2,580.37)	(2,503.56)	(796.01)

The above negative cash flows are as per IND AS restated financial statements. Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet its capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows, it may adversely affect our business and financial operations. For further details please refer to the section titled 'Financial Information' and chapter titled 'Management's Discussion and Analysis of Financial Condition and Results of Operations as reflected in the Financial Statements' beginning on pages 168 and 232 respectively, of the Draft Red Herring Prospectus.

6. We have certain contingent liabilities that have not been provided for in our Company's financials, which if realised, could adversely affect our financial condition.

Our contingent liabilities as at March 31, 2018, were as follows:

(₹ in lakhs.)

We cannot assure you that any or all of these contingent liabilities will not become direct liabilities. In the event any or all of these contingent liabilities become direct liabilities, it may have an adverse effect on our financial condition and results of operations.

7. Our operations are subject to environmental, workers' health and safety and employee laws and regulations. We may incur material costs to comply with, or suffer material liabilities or other adverse consequences as a result of, environmental laws and regulations which may have a material adverse affect on our business, financial condition and results of operations.

Our operations are subject to extensive environmental and hazardous waste management laws and regulations in India, including the Environmental Protection Act, 1986, as amended (the "Environment Act"), the Air (Prevention and Control of Pollution) Act, 1981, as amended (the "Air Act"), the Water (Prevention and Control of Pollution) Act, 1974, as amended (the "Water Act") and other regulations promulgated by the MoEF and various statutory and regulatory authorities and agencies in India. The agro chemical intermediates industry is subject to strict regulations with respect to a range of environmental matters including limitations on land use, including forest land, licensing requirements; management of materials used in manufacturing activities; the storage of inflammable and hazardous substances and associated risks; the storage, treatment and disposal of wastes; remediation of contaminated soil and groundwater; air quality standards; water pollution; and discharge of hazardous materials into the environment. The discharge or emission of chemicals, dust or other pollutants into the air, soil or water that exceed permitted levels and cause damage to others may give rise to liabilities towards the government and third parties, and may result in our incurring costs to remedy any such discharge or emissions.

The impact of these laws and regulations, or any changes to such laws or regulations, may be significant and may delay the commencement of, or cause interruptions to, our operations. We may not have complied with all such applicable environmental laws and regulations in the past and in the future may not comply with applicable laws and regulations.

Our manufacturing units are being inspected on regular basis by the Gujarat Pollution Control Board and we have been receiving notices from such regulating authorities for contravention of the provisions of the Air Act / Water Act. We have in the past received closure notices from GPCB for our manufacturing units on inspection by GPCB officials. We have been complying with / rectifying such lapses on regular basis and on verification by GPCB officials such closure notices have been revoked, however we may incur, and expect to continue to incur, significant capital and operating costs to comply with these requirements, including various provisions made for environmental related expenditure. There can be no assurance that compliance with such environmental laws and regulations will not result in a curtailment of production or a material increase in the costs of production or otherwise have a material adverse effect on our financial condition and results of operations. Environmental laws and regulations in India have become increasingly stringent, and it is possible that they will become significantly more stringent in the future. If any of our units or the operations of such units are shut down, we may continue to incur costs in complying with regulations, appealing any decision to close our facilities, maintaining production at our existing facilities and continuing to pay labour and other costs which may continue even if the facility is closed. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations may impose new liabilities on us or result in the need for additional compliance requirements and additional investment in environmental protection equipment, either of which could adversely affect our business, financial condition or prospects.

8. *Products sold by our Company are subject to independent verification by Government agencies on a sample check basis and any nonconformity with the prescribed standards may lead to adverse impact on our business.*

Quality of Pesticides products manufactured in India is open to independent verification by Government agencies. Government agencies carry out surprise sample checking of our product for their contents. In case, the content in the sample does not comply with the quality norms prescribed by the Government, or does not match with the contents as mentioned on our packaging, it could lead to issuance of show cause notices. For details of pending show cause notices issued to our company under Insecticides Act, please refer to section titled “Outstanding Litigation and Material Developments” on page 253 of this Draft red Herring Prospectus. Any failure on quality control by our Company could lead to suspension of sales of those batches and /or product in that particular state or our products being banned for sales. In past our Company has not faced any suspension/ ban on sale of any product due to such reasons. However the same cannot be guaranteed for future. Any such events are likely to impact our business.

9. *We are receiving certain export benefits, which may not be available to us in the future. Loss of these benefits in the future may result in a decrease in our margins, which could in turn result in a material adverse effect on our business, financial condition and results of operations.*

We benefit from several export promotion schemes of the central Government, including the Duty Entitlement Pass Book, which provide certain incentives such as neutralisation of custom duties levied on imported content of export product by way of credits against export products used to manufacture export products. Further these credits can be transferred to other importers for a consideration. Incomes from such sources constitute a substantial portion of our income from other operating activities. There can be no assurance that these incentives will continue in the future. The non-availability of these incentives could adversely affect our business, financial condition, results of operations and prospects.

10. *Our Promoters and Directors have interest in certain of our Group Entities/ Companies, which have objects similar to our Company, which may create a conflict of interest. Further we do not enjoy contractual protection by way of a non-compete or other agreement or arrangement with such Group Entities/ Companies.*

Our Promoters and Directors are promoters / directors of our Promoter Group Companies namely, Heranba Agro Science Limited, Shakti Bio Science Limited and Heranba Crop Care Limited which have objects similar to our Company. As these entities do not have any non-compete agreements in place amongst themselves, there is a conflict of interest between our Company and the said Promoter Group Companies. For further details please refer to the chapters titled ‘Our Promoters and Promoter Group’ and ‘Our Group Companies’ beginning on page 154 and 158 respectively of the Draft Red Herring Prospectus.

11. *Our Company does not have long-term agreements with any of our customers for purchasing its products and is subject to uncertainties in demand. There is no assurance that these customers will continue to purchase our products from us or that they will not scale down their orders. This could impact financial performance of our Company.*

Our Company has been dealing with some of our customers for several years, we do not have any long term agreements with majority of our customers. As a result, our customers can terminate their relationships with us due to a change in preference or any other reason on immediate basis, which could materially and adversely impact our business. Consequently, our revenue may be subject to variability because of fluctuations in demand for our products. Our Company's customers have no obligation to place order with us and may either cancel, reduce or delay orders. The orders placed by our Company's customers are dependent on factors such as the customer satisfaction with the level of service that our Company provides, fluctuation in demand for our Company's products, customer's inventory management, amongst others.

Although, we have a strong emphasis on quality, timely delivery of our products and personal interaction by the top management with the customers, any change in the buying pattern of buyers can adversely affect the business of our Company.

12. *Our failure to accurately forecast and manage inventory could result in an unexpected shortfall and / or surplus of products, which could harm our business.*

We monitor our inventory levels based on our own projections of future demand. Because of the length of time necessary to produce commercial quantities of our products, we must make production decisions well in advance of sales. An inaccurate forecast of demand for any product can result in the unavailability / surplus of products. This unavailability of products in high demand may depress sales volumes and adversely affect customer relationships. Conversely, an inaccurate forecast can also result in an over-supply of products, which may increase costs, negatively impact cash flow, reduce the quality of inventory, erode margins substantially and ultimately create write-offs of inventory. Any of the aforesaid circumstances could have a material adverse effect on our business, results of operations and financial condition.

13. *Our sales are to a large extent dependent on the overall area under cultivation, the cropping pattern adopted by the farming community in India, lack of monsoon and overall general weather conditions in India.*

Our Company derives majority of sales from major pesticides consuming crop like Paddy, Cotton, Sugarcane, Wheat etc. Any significant reduction in the area under cultivation in these crops may significantly reduce the demand for our products. Also the demand of our products is dependent on the cropping pattern which may vary year on year for these major crops. Any significant changes in the cultivable area and the cropping pattern in India of these crops may impact our sales and profitability. Further, the demand of our products is also dependent on the monsoon conditions and general weather conditions in India. Lack of monsoon in a particular year may result in the decline in demand for our products. Sales of agrochemical products in the domestic Indian retail market are seasonal due to the monsoon. In particular, demand for pesticides is generally higher during the monsoon season. Demand by domestic customers for our agrochemical products is also affected by weather conditions in India such as droughts, excessive rainfall and cyclones or other natural calamities such as fires, floods and earthquakes. The unpredictable effects of monsoonal weather in India, including flooding, droughts and subsequent damage to crops significantly affects crop production in India as they can be more severe than those in other countries. Any adverse weather conditions in India, or an inability to predict and plan for such adverse weather conditions, could affect farmers' decisions about the types and the quantum of crops to plant, and may lead to an adverse effect on the sales of our products, which could have an adverse effect on our business, financial condition and results of operations. Similarly in some seasons there may be stable general weather conditions and such conditions may result in decline in pest infestation and thereby resulting in decline in demand for our products. Any significant changes in the above factors may impact our sales and profitability.

14. *Quality concerns and negative publicity, if any, would adversely affect the value of our brand, and our sales.*

Our business is dependent on the trust our customers have in the quality of our products as well as on our ability to protect our brand value. Any negative publicity regarding our Company, brands or products, including those arising from a drop in quality of our products from our vendors, or any other unforeseen events could adversely affect our reputation, our brand value, our operations and our results from operations.

15. *We operate in an unorganized industry and face significant competition. Our inability to compete effectively, market our products relative to our competitors may lead to lower market share and adversely affect our operations and profitability.*

Our Company sells its products in highly competitive markets and faces competition; however it is not possible to compute the present market share of our Company since the Indian agrochemical industry is largely an unorganised

industry and there are no reliable source / report which carries this data on market share. Further, the competition in these markets is based primarily on demand creation and as a result, to remain competitive in our markets, we must continuously strive to effectively market our products. In each of our markets, we face competition primarily from the unorganized market, Indian corporates and MNCs. In the event of price competition from our competitors, we may be required to reduce the price of our products while maintaining quality standards and our Company may not always be able to do so. Some of our competitors may have greater financial resources, generate higher revenues, and therefore, be able to better respond to market changes and shifts in consumer spending patterns and changes in consumer sentiments and tastes. They also may be in a better position than us to sustain losses in revenue due to pricing pressures. Accordingly, we cannot be certain that we will be able to compete effectively with these competitors or that we will not lose customers to these competitors. If we are not able to compete effectively, our business, results of operations and financial condition could be adversely affected.

16. We have referred to the data derived from internal Company reports and industry and government publications, publicly available information and sources.

Unless stated otherwise, industry and market data used throughout this Draft Red Herring Prospectus has been obtained or derived from internal Company reports and industry and government publications, publicly available information and sources. Industry publications generally state that the information contained in those publications has been obtained from sources believed to be reliable but that their accuracy and completeness are not guaranteed and their reliability cannot be assured. Although, our Company believes that industry data used in this Draft Red Herring Prospectus is reliable, it has not been independently verified. Further, the extent to which the industry and market data presented in this Draft Red Herring Prospectus is meaningful depends on the reader's familiarity with and understanding of, the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which we conduct our business, and methodologies and assumptions may vary widely among different industry sources.

17. Our ability to introduce new products is dependent on getting the approval for manufacturing and/or selling under Insecticides Act.

As per Section 9 of the Insecticides Act, any person desiring to import or manufacture any insecticides may apply to registration committee (Central Insecticides Board and Registration Committee) for registration of such insecticides and there shall be separate registration for each insecticide. Our Company has duly obtained the registration under the Insecticides Act, 1968, for manufacturing pesticides at our Units. For details of approval our Company has for manufacturing various products, please refer to section “Government and Other Approvals” on page 261. Our ability to introduce new products either developed in house or imported from elsewhere is subject to getting these registrations. As part of our strategy, we propose to launch new formulations and generic active ingredients, primarily, pursuant to our own registrations from time to time. The process of seeking registrations for any formulation or generic active ingredient is complex, expensive and time consuming. If we are unable to successfully obtain registrations in a timely manner or at all, we may lose the market opportunities which may result in our delay or failure to recover the costs incurred towards seeking registrations and other related activities and may adversely affect our operations and profitability. Over a long period of time pests develop immunity to the pesticides used. Hence inability to launch new products to overcome such immunity will affect our business.

18. Our products may become ineffective in the long term.

From empirical tests and data, it is well documented that over a period of time pests develop immunity to the pesticides which are used constantly. Hence over a period of time the pests may develop immunity for our products. We may be required to change the chemical formula of our products and/or develop new products, which may not be as effective against the pests, which may adversely affect our business operations and our reputation. Development and registration of new products is a time consuming process and may put a strain on our financial resources.

19. Many of the materials produced at our factories are hazardous in nature. In the event of any accidents involving any such hazardous materials and substances, our Company may be held liable for subsequent damages and litigations.

Improper or negligent handling while manufacturing and/or storing hazardous material and/or substances at our units may cause personal injury or loss of life and may further lead to severe damage or destruction to property or equipment and environmental damage and may result in the suspension of operations and the imposition of civil and criminal liabilities. All our product are packed with instructions about the optimum dosage and usage method. However any wrong usage of our pesticide by any farmer could damage his crop, which could raise questions on our

product quality and tarnish our brand Image. Further, we depend on third party carriers' capability to transport these hazardous materials/substances. Any mishandling of hazardous substances by these carriers could affect our business adversely and may impose liabilities on our Company. Liabilities incurred as a result of these events have the potential to adversely impact our financial position.

20. *Fluctuations in the availability and quality of raw materials could cause delay and increase costs.*

The availability of raw materials may fluctuate significantly, depending on many factors including transportation and weather patterns. For details of raw materials used by us please refer to paragraph titled "Raw Materials" under chapters titled 'Our Business' beginning on page 99 respectively of the Draft Red Herring Prospectus. Though we cover purchases on a monthly basis, we are still exposed to and will have to absorb any fluctuations in the prices including that of crude oil. We do not and will not have control over the factors affecting prices for crude oil. Historically, international prices for crude oil have been volatile and have fluctuated widely in response to changes in many factors. Such fluctuations in the prices of crude oil may result in fluctuations in the cost of our raw materials which in turn may have a material adverse effect on our results of operations.

Any material shortage or interruption in the supply or decrease in the quality of raw materials due to natural causes or other factors could result in increased production costs that we may not be able to pass on to our customers, which in turn would have a material adverse effect on our margins and results of operations.

Further, our suppliers of other raw materials may allocate their resources to service other clients ahead of us. While we believe that we could find additional vendors to procure other raw materials, any failure of our suppliers to deliver such raw materials in the necessary quantities or to adhere to delivery schedules or specified quality standards and technical specifications would adversely affect our production processes and our ability to deliver orders on time and at the desired level of quality. As a result, we may lose customers, which could have a material adverse effect on our business, financial condition and results of operations.

21. *Raw materials constitute a significant percentage of our Company's total expenses. Any increase in prices and any decrease in the supply would materially adversely affect our Company's business.*

Raw materials constitute a significant percentage of the total expenses of our Company. The cost of materials consumed accounted for 66.23%, 69.46% and 67.18% of total income in each of the Financial Years 2018, 2017 and 2016 respectively. Any increase in the price of raw materials, which our Company is unable to pass on the impact of, would have a material adverse effect on our Company's business. We are exposed to the price risk associated with purchasing our raw materials, which form the highest component of our expenses. We typically do not enter into formal arrangements with our vendors. Therefore, fluctuations in the price and availability of raw materials may affect our business and results of operations. We do not currently engage in any hedging activities against commodity price risk. Any material shortage or interruption in the domestic and international supply or decrease in the quality of raw materials due to natural causes or other factors could result in increased production costs that our Company may not successfully be able to pass on to customers, which in turn would have a material adverse effect on our Company's business.

22. *We are a labour intensive industry and hence may face labour disruptions and other planned and unplanned outages that would interfere with our operations.*

Our Company's activities are labour intensive. Strikes and other labour action may have an adverse impact on our operations, though we have not experienced any such labour disruption in the past. We cannot guarantee that we will not experience any strike, work stoppage or other industrial action in the future. Also, the third-party suppliers of raw materials, which we use may experience strikes or other industrial action. Any such event could disrupt our operations, possibly for a significant period of time, result in increased wages and other costs and otherwise have a material adverse effect on our business, results of operations or financial condition. For further details, please refer to the paragraph titled 'Manpower' under chapter titled 'Our Business' beginning on page 99 of the Draft Red Herring Prospectus. In addition, work stoppages, refurbishments, installation of new plants, accidents or sustained bad weather at our operations could result in production losses and delays in delivery of our products, which may adversely affect our operations and profitability. Production may also fall below historic or estimated levels as a result of unplanned outages.

23. *Unfavourable local and global weather patterns may have an adverse effect on our business, results of operations and financial condition.*

As an agri-based company, our businesses are sensitive to weather conditions, including extremes such as drought and natural disasters. There is growing concern that carbon dioxide and other greenhouse gases in the atmosphere may have an adverse impact on global temperatures, weather patterns and the frequency and severity of extreme weather and natural disasters. Adverse weather conditions may also cause volatility in the prices of commodities, which may affect growers' decisions about the types and quantum of crops to plant and may consequently affect the sales of our pesticides and agro chemicals. Consequently, the occurrence of any such unfavourable weather patterns may adversely affect our business, results of operations and financial condition.

24. *The loss resulting from shutdown of operations at any of our units could have an adverse effect on our Company.*

Our units are subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, natural disasters, industrial accidents. Our units use complex equipment and machinery, and the breakdown or failure of equipment or machinery may result in us having to make repairs or procure replacements which may require considerable time and expense. Although our Company have not had such incident in the past and while we have insurance cover for both our facilities, including for loss of profit due to accidental shut down, the same may not be adequate to cover the loss in business. Although we take precautions to minimise the risk of any significant operational problems at our units they could have adverse effect on our financial performance.

25. *Our business is dependent on our manufacturing facilities, the majority of which are geographically located in one area, Gujarat. Any loss or shutdown of operations at any of our manufacturing facilities in Gujarat may have an adverse effect on our business and results of operations.*

All our manufacturing facilities are based in Vapi, Valsad, Gujarat. As a result, if there is any localised social unrest, natural disaster or breakdown of services and utilities in Gujarat, it may affect our business adversely. Further our manufacturing activities are subject to operating risks, such as breakdown or failure of equipment, power supply or processes, performance below expected levels of output or efficiency, obsolescence, labour disputes, strikes, lock-outs, continued availability of services of our external contractors, earthquakes and other natural disasters, industrial accidents etc. We have not experienced any of these operating risks in the past. Although we have contingency plans to meet most of our operating risks we cannot assure you about the adequacy of such plans will be adequate to meet all of our operating risks.

26. *Our manufacturing Unit 4 has been leased to our Group Company, Heranba Agro Science Limited by GIDC. We are utilising the said plot of land without the payment of any rent to Heranba Agro Science Limited. In the event of termination of leases, our business and revenues may be materially adversely affected.*

The land for our manufacturing Unit 4 located at Plot No. 1409, Phase III, G.I.D.C, Vapi, Taluka-Pardi, District - Valsad, 396 195, Gujarat at Vapi Notified Industrial Area consisting of Revenue Survey No. 117 P/ within Village limits of Chhiri, Taluka Pardi, District Valsad has been leased to our Group Company, Heranba Agro Science Limited by GIDC. We are utilising the said plot without the payment of any rent. Further the terms of the usage by us are also not formally defined. Any adverse impact on the leasehold rights of the Heranba Agro Science Limited, breach of the contractual terms of any leases or any inability to renew such agreements on acceptable terms may impede the effective future operations of our Unit IV. We cannot assure you that alternative premises will be available at the same or similar costs or locations, in a timely manner or at all. This may have an adverse impact on our business, operations and revenues.

27. *We do not own our marketing office and any revocation or adverse changes in the terms of our leases may have an adverse effect on our business, prospects, results of operations and financial condition.*

We have entered into a lease agreement in respect of our Marketing Office situated at Office no. 301, Soni Shopping Centre, L. T. Road, Borivali West, Mumbai - 400 092, Maharashtra. This lease is valid until February 9, 2023. If the owner of the premises revokes the arrangements under which we occupy the premises or imposes terms and conditions that are unfavourable to us, we may suffer a disruption in our operations or have to pay increased rent, which could have a material adverse effect on our business, prospects, results of operations and financial condition. For further details, see the section titled "Business – Property" on page 123.

28. *Under-utilisation of our manufacturing unit, which our Company proposes to expand may adversely impact our financial performance.*

Our Company intends to expand its production capacities based on our estimates of market demand and profitability. In the event of non-materialisation of our estimates and expected order flow for our products, due to factors including adverse economic scenario, change in demand or for any other reason, our capacities may not be fully utilized thereby adversely impacting our financial performance.

29. *Our Company is dependent on third party transportation providers for the supply of raw materials and delivery of our products and any disruption in their operations or a decrease in the quality of their services could affect our Company's reputation and results of operations*

Our Company uses third party transportation providers for the supply of most of our raw materials and delivery of our products to our domestic customers. Though our business has not experienced any disruptions due to transportation strikes in the past, any future transportation strikes may have an adverse effect on the supplies from our suppliers and deliveries to our customers. These transportation facilities may not be adequate to support our existing and future operations. In addition, raw materials and products maybe lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of raw materials and products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our products to our customers may have an adverse effect on our business and results of operations.

Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure and port facilities, or other events could impair our ability to supply our products to our customers. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

30. *Our Company may not be able to maintain or further develop its distribution network; the same can adversely affect our revenues.*

We sell our products with the help of a wide distribution network of branches, C & F agents and various dealers / distributors across India. In case we are not able to maintain our existing distribution network or to expand it further, can adversely affect our growth and revenues. In case we are not able to market our products or cater to our customers' requirements in a timely manner, it may affect our results of operation and financial condition adversely.

31. *Our business and profitability will suffer if we fail to anticipate and develop new products and enhance existing products in order to keep pace with rapid changes in customer preferences and the industry on which we focus.*

The agrochemical business is characterized by constant product innovation due to rapid technological change, evolving industry standards. Creativity is one of the key attributes for success in our industry. To compete successfully in the industry, we must be able to identify and respond to changing demands and preferences, as well as operate within substantial production and delivery constraints. Changes in product mix impacts our operating results and our margins. We cannot assure you that our products will always gain buyer acceptance and we will always be able to achieve internationally competitive products to meet customer expectations. Failure to identify and respond to changes in consumer preferences could, among other things, limit our ability to differentiate our products, adversely affect consumer acceptance of our products, and lower sales and gross margins. Further, products, that are developed by our competitors may render our offerings non-competitive or force us to reduce prices, thereby adversely affecting our margins. Any of these factors could have a material adverse effect on our business and results of operations.

32. *Product innovation and research and development (R&D) activities are an integral part of our business model. If our research and product development efforts are not successful, our business may be restricted which may in turn have an adverse effect on our business and financial condition.*

Product Innovation and Research and Development (R&D) activities are an integral part of our business model. Our Company needs to introduce new products and further expand into additional areas to remain successful in the future. Our Company's plans to introduce new products into markets and diversify the areas in which it operates may not be successful. Any material adverse developments with respect to the sale or use of our products, failure to successfully introduce new products or implement our expansion strategies, could have a material adverse effect on the business and financial condition of our Company. Further, new products currently under development, if and when fully developed and tested, may not perform as per our expectations and our Company may not be able to successfully and profitably produce and market such products, which may consequently restrict our business and affect our financial condition.

33. *We are subject to risks arising from foreign exchange rate movements.*

Our exchange rate risk primarily arises from our foreign currency revenues, receivables, payables etc. We have significant revenues in foreign currencies especially US\$. The foreign exchange fluctuation affects both the revenues and expenditures in absolute terms when converted into Indian rupees. To this extent, the revenues and expenditures will be higher or lower depending on the depreciation or appreciation of Indian Rupee in foreign currency terms.

Our overseas revenue for Fiscal 2018 was 49.32% of our gross sales and the same of 35% of our gross sales for Fiscal 2017. The exchange rate between the Indian Rupee and the United States Dollar has been volatile in recent years and may fluctuate in the future. Therefore, changes in the exchange rate between the Indian Rupee and the US\$ may have a material adverse effect on our revenues, other income, operating costs and net income, which may in turn have a negative impact on our business, operating results and financial condition.

For further details please refer to the paragraph titled ‘*Foreign Exchange Risk*’ under the chapter titled ‘*Management’s Discussion and Analysis of Financial Condition and Results of Operations*’ beginning on page 232 of the Draft Red Herring Prospectus.

34. *Any restriction or decline on exports to China, the country to which we export a substantial portion of our overseas revenues, or any other general restriction or curtailment on export of any products we manufacture, could adversely affect our business, financial condition and results of operations.*

At present, a substantial portion of our products are exported to China. Any restrictions, either from the central or state governments of India, or from China, on such exports may adversely affect our business, prospects, financial condition and results of operations. Other general restrictions or curtailment on export of any products we manufacture could adversely affect our business. Our exports revenue from China was ₹ 17,234.27 lakhs which was 46.89% of our total overseas revenues of ₹ 36,751.50 Lakhs during FY 2018. Any restrictions on the export of our products will have an adverse effect on our ability to sale these products, which could have an adverse effect on our business, prospects, and results of operation. There can be no assurance that such restrictions will not be imposed in the future, or that if such restrictions are imposed, we can find alternative countries to export our products. If, for any reason, our clients in China, Iran, Vietnam and Thailand, should curtail or discontinue their usage of products procured from us, or they find alternative vendors our revenues could be disrupted and our business, financial condition and results of operations could be adversely affected.

35. *We have limited knowledge and records of documents relating to corporate actions undertaken by our Company prior to March 2001.*

We cannot assure you that these form filings and corporate records will be available in the future or that we will not be subject to any penalty imposed by the competent regulatory authorities in this respect or incur additional expenses arising from our inability to furnish correct particulars in respect of the RoC filings or other corporate records or for any misrepresentation of facts which may occur as a result of the non-availability of relevant documents.

36. *We have made Company Law related non-compliances in the past. We may be subject to regulatory action, including monetary penalty that may be imposed on us.*

We have in the past have done non-compliances in respect of certain company law related matters. In such a scenario, notices maybe issued upon our Company and fines or penalties may also be imposed upon our Company, which may adversely affect our business and operations from compliance perspective. There can be no assurance that no penal action will be taken against us by the relevant regulators with respect to such delay in filings. In the event that any adverse actions are taken against us, our results of operation could be adversely affected. The below mentioned is the list of non-compliances with regards to Companies Act, 2013:

1. Section 203 of Companies Act 2013 – Appointment of Company Secretary since FY 2015 when our paid-up capital exceeded ₹ 500.00 Lakhs.

However On August 31, 2018, both the Audit Committee and Nomination and Remuneration Committee were formed in compliance of SEBI (LODR), Regulations and The Companies Act, 2013.

37. *We have made allotment of 1,17,000 Equity shares on May 8, 2015 without compliance of section 42(6) of The Companies Act, 2013.*

The Company had made allotment of 53,500 Equity Shares to Sadashiv K. Shetty, 52,000 Equity Shares to Raghuram K. Shetty and 11,500 Equity Shares to Sujata S. Shetty on May 8, 2015. As per Section 42(6) of the Companies Act, 2013, the monies received on application shall be kept in a separate bank account in a scheduled bank and shall not be utilised for any purpose other than for allotment of shares. Our company has deposited the application money in Cash Credit Account which amounts to utilization of fund before the allotment of shares. The Contravention of the Provision of Section 42 shall attract penalty against our company, its promoters and Directors. In such a scenario, notices maybe issued upon our Company and fines or penalties may also be imposed upon our Company.

38. *We have made violation of section 135 of The Companies Act, 2013 regarding Corporate Social Responsibility.*

There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.*

Our Company has entered into related party transactions with our Promoters and Promoter Group Entities in the past. While our Company believes that all such transactions have been conducted on an arm's length basis and are accounted as per Accounting Standard 18, however there can be no assurance that we could not have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we may enter into related party transactions in the future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operations.

For further details please refer to the section titled '*Financial Information*' beginning on page 168 of the Draft Red Herring Prospectus.

40. *Our success depends largely upon the services of our Promoters, Executive Directors and other Key Managerial Personnel and our ability to attract and retain them. Demand for Key Managerial Personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.*

Our Chairman and Managing Director, Sadashiv K. Shetty and our whole time Director Raghuram K. Shetty have over the years built relations with suppliers, customers and other persons who are connected with us. Our Key Managerial Personnel have also substantially contributed for our growth. Our success is substantially dependent on the expertise and services of our Directors and our Key Managerial Personnel. They provide expertise which enables us to make well informed decisions in relation to our business and our future prospects. Our future performance will depend upon the continued services of these persons. Demand for Key Managerial Personnel in the industry is intense. We cannot assure you that we will be able to retain any or all, or that our succession planning will help to replace, the key members of our management. The loss of the services of such key members of our management team and the failure of any succession plans to replace such key members could have an adverse effect on our business and the results of our operations.

41. *Our agreements with various financial institutions for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for short term and long term borrowings with certain financial institutions. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as to obtain either the prior written consent of such financial institutions or require us to give prior written intimation to such lenders, prior to, amongst other circumstances, creating further encumbrances on our assets, disposing of assets outside the ordinary course of business, paying dividends to our shareholders, undertaking guarantee obligations, alteration of our capital structure, raising of additional equity or debt capital, incurrence of indebtedness, undertaking any merger, amalgamation, restructuring or changes in management. Our ability to execute business plans, including our ability to obtain additional financing on terms and conditions acceptable to us, could be negatively impacted as a result of these restrictions and limitations. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. Although we have received consents from our lenders for the Issue, we cannot assure you that we will be able to receive such consents in future.

For further details, please refer to the section ‘*Financial Indebtedness*’ beginning on page 249 of the Draft Red Herring Prospectus.

42. *Our Promoters and Directors have provided personal guarantees for our loans, and any failure or default by us to repay such loans in accordance with the terms and conditions of the financing documents could trigger repayment obligations, which may adversely affect our Promoters’ ability to manage our affairs.*

We have obtained loans in the ordinary course of business for the purposes of working capital and other business requirements. Our Promoters, Sadashiv K. Shetty, Raghuram K. Shetty and our Executive Directors Sujata S. Shetty and Vanita R. Shetty have given personal guarantees in relation to certain of our loans. For details, see “Financial Indebtedness” on page 249. In the event of default on the loans, the guarantees may be invoked by our lenders thereby adversely affecting our Promoters’ ability to manage our affairs and this, in turn, could adversely affect our business, prospects, financial condition and results of operations. Further, if any of these guarantees are revoked by our Promoters, our lenders may require alternate security or guarantees and may seek early repayment or terminate such facilities. We may not be successful in providing alternate guarantees satisfactory to the lenders, and as a result may be required to repay outstanding amounts or seek additional sources of capital. Any such event could adversely affect our financial condition and results of operations. For further details in relation to the personal guarantees provided by our Selling Shareholders, see “History and Certain Corporate Matters” on page 132.

43. *We have not yet received the NOC from one of our lenders, Syndicate Bank.*

We have not yet received the NOC from one of our lenders, Syndicate Bank. We have obtained loans in the ordinary course of business for the purposes of working capital and other business requirements. The terms of these loans contain certain restrictive covenants including our Company shall not without the prior written permission of bank amend its Memorandum and Articles of Association or alter its capital structure or approach the capital market for meeting additional resources either in the form of debt or equity. If we do not receive the said NOC from Syndicate Bank at all or on time, we may not be able to complete our IPO plan at all or our IPO plan may be delayed. We may be forced to additional sources of capital. Any such event could adversely affect our financial condition and results of operations.

- 44. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in delay or abandonment of any or all of our business development plans and this may have an adverse effect on our business and results of operations.**

We may require additional funds in connection with future business expansion and development initiatives. In addition to the net proceeds of this offering and our internally generated cash flow, we may need other sources of funding to meet these requirements, which may include entering into new debt facilities with lending institutions or raising additional debt in the capital markets. If we decide to raise additional funds through the issuance of debt, our interest obligations will increase, and we may be subject to additional covenants. Such financing could cause our debt to equity ratio to increase or require us to create charges or liens on our assets in favour of lenders. We cannot assure you that we will be able to secure adequate financing in the future on acceptable terms, in time, or at all. Our failure to obtain sufficient financing could result in delay or abandonment of any or all of our business development plans and this may have an adverse effect on our business and results of operations.

- 45. Our operations are subject to high working capital requirements. Our inability to obtain and / or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our requirement of working capital or pay our debts, could adversely affect our operations.**

Our business requires significant amount of working capital. In many cases, significant amount of our working capital is required for purchasing and maintaining of stock of goods. Most of these materials are purchased locally or are imported. Though, presently we have sanctioned working capital limits from the existing bankers and one of the objects of the Issue is to meet our future working capital requirements, we may need to incur additional indebtedness in the future to satisfy our working capital needs. All these factors may result in increase in the quantum of our current assets and short-term borrowings. Our inability to obtain and / or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our requirement of working capital or pay our debts, could adversely affect our financial condition and results of operations.

- 46. Our Company has issued Equity Shares in the one year immediately preceding the date of this Draft Red Herring Prospectus at a price which is lower than the Offer Price.**

Date of allotment	Number of Equity Shares allotted	Face value (₹)	Issue Price (₹)	Nature of Consideration	Nature of allotment	Percentage of Pre- Offer Equity Share Capital (%)	Percentage of Post- Offer Equity Share Capital (%)

- 47. Members of our Promoter Group will continue to retain significant control in our Company after the Issue, which will allow them to influence the outcome of matters submitted to shareholders for approval. Such a concentration of ownership may also have the effect of delaying, preventing or deterring a change in control.**

After the completion of this Issue, our Promoters and Promoter Group will continue to hold 74.85% of the paid up Equity Share capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting, and our other shareholders will be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business, which may conflict with our interests or the interests of our minority shareholders, such as actions which delay, defer or cause a change of our control or a change in our capital structure, merger, consolidation, takeover or other business combination involving us, or which

discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of us. We cannot assure you that our Promoter and members of our Promoter Group will act in our interest while exercising their rights in such entities, which may in turn materially and adversely affect our business and results of operations. We cannot assure you that our Promoter will act to resolve any conflicts of interest in our favour. If our Promoter sells a substantial number of the Equity Shares in the public market, or if there is a perception that such sale or distribution could occur, the market price of the Equity Shares could be adversely affected. No assurance can be given that such Equity Shares that are held by the Promoter will not be sold any time after the Issue, which could cause the price of the Equity Shares to decline.

48. *Some of our Group Companies has incurred losses in the past, which may have an adverse effect on our reputation and business.*

49. *Increasing employee compensation in India may reduce our Company’s profit margins.*

Increase in compensation levels in India may negatively affect our profit margins. Employee compensation in India is currently increasing which could result in increased costs of production. Our Company may need to continue to increase levels of employee compensation to manage attrition. Any increases in the amount of compensation paid to our Company’s employees could have a significant effect on our costs, which may affect our position in our industry and have a material adverse effect on our business and financial operations.

50. *Our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures and are also prohibited by the terms of our financing arrangements.*

Our Company has track of paying dividends since last five financial years. The amount of our future dividend payments, if any, will depend upon factors that our Board deems relevant, including among others, our results of future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

51. *Our insurance cover may not adequately protect us against all material hazards.*

Our Company has various insurance policies covering stocks, building, furniture, plant and machinery, etc. We believe that we have insured ourselves against the majority of the risks associated with our business. Our significant insurance policies provide cover for risks relating to physical loss, theft or damage to our assets, as well as business interruption losses. While we believe that the policies that we maintain would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time, or that we have obtained sufficient insurance (either in amount or in terms of risks covered) to cover all material losses. To the extent that we suffer loss or damage for events for which we are not insured or for which our insurance is inadequate, the loss would have to be borne by us, and, as a result, our results of operations and financial condition could be adversely affected.

52. *Any changes in regulations or applicable government incentives would materially adversely affect our Company’s operations and growth prospects.*

Our Company is subject to regulations in India. Our Company’s business and prospects could be adversely affected by changes in any of these regulations and policies, or if any or all of the incentives currently available cease to be, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite approvals in the future for its operations or that compliance issues will not be raised in respect of its operations, either of which would have a material adverse affect on our Company’s operations and financial results.

For further details, please refer to the chapter titled ‘Key Industry Regulations and Policies in India’ beginning on page 126 of the Draft Red Herring Prospectus.

53. *Any of our violation of the Metrology Act and the Metrology Rules may lead to fines and penalties, or seizure and forfeiture of our products which could adversely affect our business.*

Some of our products and the packaging of our products are required to comply with the standards of weight, measurement and numbers prescribed under the Metrology Act and the Metrology Rules. For details, see “Key Industrial Regulations and Policies in India” on page 126. Normally, we deliver a significant portion of our products against future payment. The bad debts written off for the Fiscal 2018 were ₹ 1022.91 lakhs. In the event of certain abnormal / exceptional circumstances, there may be significant or material losses on account of bad debts, which would have a material adverse impact on our business, results of operations and financial condition.

55. *The objects of the Issue for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled “Objects of the Issue”. Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.*

Our funding requirements and the deployment of the proceeds of the Issue are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time and consequently our funding requirements may also change. Our estimates for the may exceed the value that would have been determined by third party appraisals and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the objects of the Issue is entirely at the discretion of our management. However Our Company shall appoint a monitoring agency in relation to the Fresh Issue as required under the SEBI ICDR Regulations prior to filing of the Red Herring Prospectus with the RoC. Our Board will monitor the utilisation of the Net Proceeds through its Audit Committee. Our Company will disclose the utilisation of Net Proceeds under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilised

56. *We have not made firm arrangements with any bank or financial institution for funding of our balance working capital requirements. The failure to obtain additional financing may adversely affect our ability to grow and our future profitability.*

Additional working capital requirement has been estimated at ₹ [●] lakhs for the Fiscal 2019, of which a amount of ₹ [●] lakhs would be funded out of the Issue Proceeds, whereas the balance amount i.e. ₹ [●] lakhs would be arranged out of internal accruals and/or loan funds. However, as on date of the Draft Red Herring Prospectus our Company has not made firm arrangements with any bank or financial institution for funding of our balance working capital requirements. Our Company cannot assure you that we will be able to raise such additional financing on acceptable terms in a timely manner or at all. Our failure to renew existing funding or to obtain additional financing on acceptable terms and in a timely manner could materially and adversely impact our planned capital expenditure, which, in turn, could materially and adversely affect our business, financial condition and results of operations.

EXTERNAL RISK

57. *Any downturn in the macroeconomic environment in India could adversely affect our business, results of operations, cash flows and financial condition.*

India is our key market. For Fiscal 2018, more than 50% of our Company’s revenue from operations was from India. In addition, an increase in India’s trade deficit, a downgrading in India’s sovereign debt rating or a decline in India’s

foreign exchange reserves could increase interest rates and adversely affect liquidity, which could adversely affect the Indian economy and our business, results of operations, cash flows and financial condition.

58. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, in the jurisdictions in which we operate may adversely affect our business and results of operations.*

Our business is subject to various laws and regulations, which are evolving and subject to change. For details, see “Key Industrial Regulations and Policies in India” on page 126. We are also subject to corporate, taxation and other laws in effect in India, which require continued monitoring and compliance. These laws and regulations and the way in which they are implemented and enforced may change. There can be no assurance that future legislative or regulatory changes will not have any adverse effect on our business, results of operations, cash flows and financial condition.

59. *Significant differences exist between Ind AS and Indian GAAP and other accounting principles, such as IFRS and US GAAP, which may be material to investors’ assessments of our financial condition, result of operations and cash flows.*

Our financial statements for Fiscals 2014 and 2015 included in this Draft Red Herring Prospectus are prepared and presented in conformity with Indian GAAP, while our financial statements for Fiscals 2018, 2017 and 2016 included in this Draft Red Herring Prospectus are prepared and presented in conformity with Ind AS, in each case restated in accordance with the requirements the SEBI (ICDR) Regulations and the Guidance Note on “Reports in Company Prospectuses (Revised 2016)” issued by the ICAI. Ind AS differs from Indian GAAP and other accounting principles with which prospective investors may be familiar in other countries, such as IFRS and U.S. GAAP. As a result, the financial statements prepared under Ind AS for Fiscals 2018, 2017, and 2016 may not be comparable to our historical financial statements. Accordingly, the degree to which the Financial Statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader’s level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should limit their reliance on the financial disclosures presented in this Draft Red Herring Prospectus.

RISKS RELATING TO THE EQUITY SHARES AND THE OFFER

60. *Investors bear the risk of fluctuations in the price of Equity Shares and there can be no assurance that a liquid market for our Equity Shares will develop following the listing of our Equity Shares on the Stock Exchanges.*

There has been no public market for our Equity Shares prior to the Offer. The purchase price of our Equity Shares in the Offer will be determined by our Company and the Selling Shareholder, in consultation with the BRLM, pursuant to the Book Building Process. This price will be based on numerous factors, as described under in “Basis for Offer Price” on page 80. This price may not necessarily be indicative of the market price of our Equity Shares after the Offer is completed. You may not be able to re-sell your Equity Shares at or above the Offer price and may as a result lose all or part of your investment.

Our Equity Shares are expected to trade on NSE and BSE after the Offer, but there can be no assurance that active trading in our Equity Shares will develop after the Offer, or if such trading develops that it will continue. Investors may not be able to sell our Equity Shares at the quoted price if there is no active trading in our Equity Shares.

The price at which our Equity Shares will trade at after the Offer will be determined by the marketplace and may be influenced by many factors, including:

- Our financial condition, results of operations and cash flows;
- The history of and prospects for our business;
- An assessment of our management, our past and present operations and the prospects for as well as timing of our future revenues and cost structures; and
- The valuation of publicly traded companies that are engaged in business activities similar to ours;
- quarterly variations in our results of operations;
- results of operations that vary from the expectations of securities analysts and investors;
- results of operations that vary from those of our competitors;
- changes in expectations as to our future financial performance, including financial estimates by research analysts and investors;
- a change in research analysts’ recommendations;

- announcements by us or our competitors of significant acquisitions, strategic alliances, joint operations or capital commitments;
- announcements of significant claims or proceedings against us;
- new laws and government regulations that directly or indirectly affect our business;
- additions or departures of Key Management Personnel;
- changes in the interest rates;
- fluctuations in stock market prices and volume; and general economic conditions.

The Indian stock markets have, from time to time, experienced significant price and volume fluctuations that have affected market prices for the securities of Indian companies. As a result, investors in our Equity Shares may experience a decrease in the value of our Equity Shares regardless of our financial performance or prospects.

61. *Our Company will not receive any proceeds from the Offer for Sale portion*

This Offer includes an offer for sale of up to 72,16,000 Equity Shares aggregating up to ₹ [●] lakhs by Selling Shareholders. The proceeds from the Offer for Sale will be paid to the Selling shareholders and our Company will not receive any such proceeds. See “Objects of the Offer” on page 75.

62. *Any future issuance of Equity Shares by us or sales of Equity Shares by the Promoters could adversely affect the trading price of our Equity Shares and in the case of the issuance of Equity Shares by us result in the dilution of our then current shareholders.*

As disclosed in “Capital Structure” on page 60, an aggregate of 20% of our fully diluted post-Offer capital held by our Promoters shall be considered as minimum Promoters’ contribution and locked in for a period of three years and the balance Equity Shares held by the Promoters following the Offer (assuming all of the Offered Shares are sold in the Offer) will be locked-in for one year from the date of Allotment. Except for the customary lock-in on our ability to issue equity or equity-linked securities discussed in “Capital Structure” on page 60, there is no restriction on our ability to issue Equity Shares. As such, there can be no assurance that our Company will not issue additional Equity Shares after the lock-in period expires or that the Promoters will not sell, pledge or encumber their Equity Shares after the lock-in periods expire. Future issuances of Equity Shares or convertible securities and the sale of the underlying Equity Shares could dilute the holdings of our Shareholders and adversely affect the trading price of our Equity Shares. Such securities may also be issued at prices below the then trading price of our Equity Shares or the Offer Price. Sales of Equity Shares by the Promoters could also adversely affect the trading price of our Equity Shares.

63. *You will not be able to immediately sell any of the Equity Shares you purchase in this Issue on the Stock Exchanges.*

Under the SEBI (ICDR) Regulations, we are permitted to allot Equity Shares within four (4) Working Days of the Bid/Issue Closing Date. Consequently, the Equity Shares you purchase in the Issue may not be credited to your book or dematerialized account with the Depository Participants until fifth (5) Working Days after the Bid/Issue Closing Date. You can start trading in the Equity Shares only after they have been credited to your dematerialized account and listing and trading permissions are received from the Stock Exchanges.

64. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Previously, any gain realized on the sale of listed equity shares on or before March 31, 2018 on a stock exchange held for more than 12 months was not subject to long term capital gains tax in India if Securities Transaction Tax (“STT”) was paid on the sale transaction and additionally, as stipulated by the Finance Act, 2017, STT had been paid at the time of acquisition of such equity shares on or after October 1, 2004, except in the case of such acquisitions of Equity Shares which are not subject to STT, as notified by the Central Government under notification no. 43/2017/F. No. 370142/09/2017-TPL on June 5, 2017. However, the Finance Act, 2018, now seeks to tax on such long-term capital gains exceeding ₹ 100,000 arising from sale of equity shares on or after April 1, 2018, while continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such Equity Shares. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares will be exempt from taxation in India in cases where the exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on a gain upon the sale of the Equity Shares.

65. *QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Bidders are not permitted to withdraw or lower their Bids (in terms of quantity of Equity Shares or the Bid Amount) at any stage after submitting a Bid. Retail Individual Bidders can revise their Bids during the Bid/Offer Period and withdraw their Bids until Bid/Offer Closing Date. While we are required to complete Allotment, listing and commencement of trading pursuant to the Offer within six Working Days from the Bid/ Offer Closing Date, events affecting the Bidders' decision to invest in our Equity Shares, including adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, cash flows and financial condition may arise between the date of submission of the Bid and Allotment, listing and commencement of trading. We may complete the Allotment, listing and commencement of trading of our Equity Shares even if such events occur and such events may limit the Bidders' ability to sell our Equity Shares Allotted pursuant to the Offer or may cause the trading price of our Equity Shares to decline on listing.

66. *Public companies in India, including us, are required to compute income tax under the ICDS. We may be negatively affected by ICDS.*

The Ministry of Finance, Government of India had issued a notification dated March 31, 2015 presenting the ICDS (Income Computation and Disclosure Standards), which creates a new framework for the computation of taxable income. The ICDS was applicable from April 1, 2016, with Fiscal 2017 being the first assessment year. The ICDS deviates in several respects from concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. For example, where ICDS-based calculations of taxable income differ from Indian GAAP or Ind AS-based concepts, the ICDS-based calculations have the effect of requiring taxable income to be recognised earlier, increasing overall levels of taxation or both. There can be no assurance that the adoption of the ICDS will not adversely affect our results of operation and financial condition.

SUMMARY OF INDUSTRY

Agriculture in India

Source: <https://www.ibef.org/industry/agriculture-india.aspx>

Introduction

Agriculture plays a vital role in India's economy. Over 58 per cent of the rural households depend on agriculture as their principal means of livelihood. The share of primary sectors* (including agriculture, livestock, forestry and fishery) is estimated to be 20.4 per cent of the Gross Value Added (GVA) during 2016-17 at current prices. . GVA from the sector is estimated to have grown at 3 per cent in FY18.

The Indian food industry is poised for huge growth, increasing its contribution to world food trade every year due to its immense potential for value addition, particularly within the food processing industry. The Indian food and grocery market is the world's sixth largest, with retail contributing 70 per cent of the sales. The Indian food processing industry accounts for 32 per cent of the country's total food market, one of the largest industries in India and is ranked fifth in terms of production, consumption, export and expected growth. It contributes around 8.80 and 8.39 per cent of Gross Value Added (GVA) in Manufacturing and Agriculture respectively, 13 per cent of India's exports and six per cent of total industrial investment.

Market Size

During 2017-18 crop year, food grain production is expected to reach a record 277.49 million tonnes. During 2016-17, it was 275.68 million tonnes.

India has been the world's largest producer of milk for the last two decades and contributes 19 per cent of the world's total milk production.

India is emerging as the export hub of instant coffee which has led to exports of coffee increase 17 per cent in calendar year 2017 to reach US\$ 958.80 million. Tea exports from India reached a 36 year high of 240.68 million kgs in CY 2017.

India topped the list of shrimp exporters globally in 2016 with exports of US\$ 3.8 billion which are expected to double to US\$ 7 billion by 2022.

Total area in India, sown with rabi crops reached 64.29 million hectares in February 2018.

India is the second largest fruit producer in the world. India's horticulture output reached 300.64 million tonnes in 2016-17 and is expected to reach 305.43 million tonnes in 2017-18.

Agricultural export constitutes 10 per cent of the country's exports and is the fourth-largest exported principal commodity. Agricultural exports from India reached US\$ 28.09 billion during April 2017-January 2018 with exports of basmati, buffalo meat reaching US\$ 6.19 billion and US\$ 6.59 billion, respectively.

India is the largest producer, consumer and exporter of spices and spice products. Spice exports from India grew by 6 per cent year-on-year between April-September 2017 to US\$ 1.37 billion.

Dairy sector in India is expected to grow at 15 per cent CAGR to reach Rs 9.4 trillion (US\$ 145.7) billion by 2020.

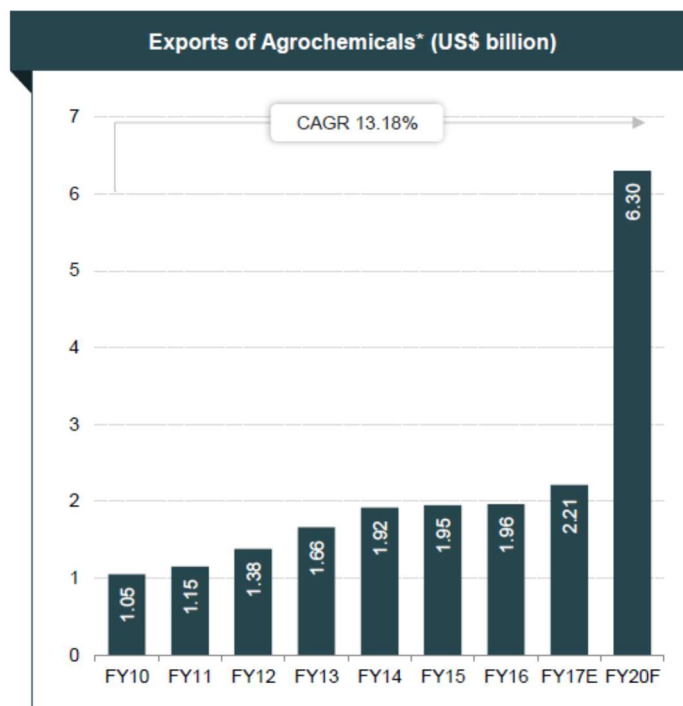

The online food delivery industry grew at 150 per cent year-on-year with an estimated Gross Merchandise Value (GMV) of US\$ 300 million in 2016. The sector grew 15 per cent every quarter during January-September 2017.

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price.

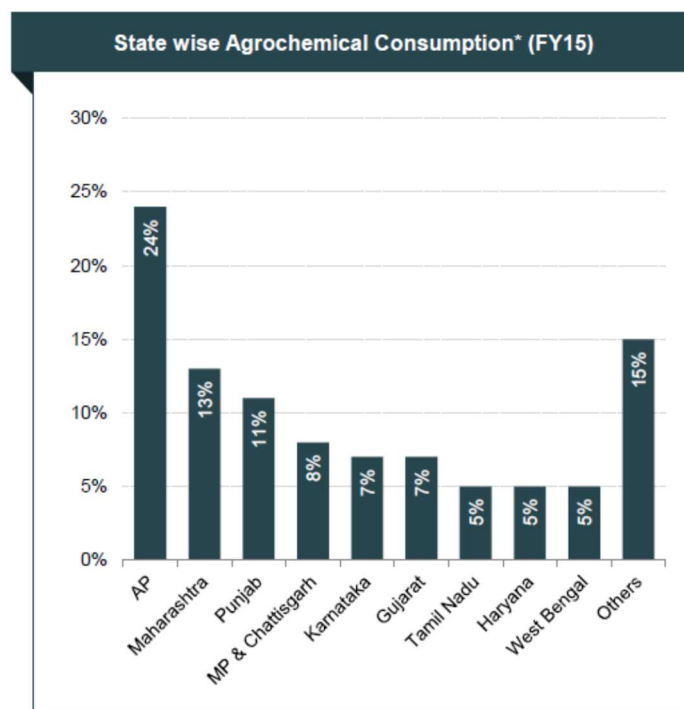

Agrochemicals

Source: IBEF, Agriculture and Allied Industries, February 2018

India is the 4th largest producer of agrochemicals, globally and ranks 4th in terms of production of crop protection chemicals. The market in India is expected to reach to US\$ 7.5 billion by FY19 and register exports of about 50 per cent of value of Indian crop protection industry. In 2015, India became one of the largest exporters of agrochemicals globally. Agrochemical companies in India witnessed a CAGR of 10 per cent from FY13-17E . Around 50 per cent of this growth was based on exports.

Agrochemical industry in India is set to grow at a significant pace; increasing population, decreasing per capita availability of arable land and focus on increasing agricultural yield will fuel the demand for agrochemicals. India's per hectare agrochemical consumption is set to rise in the coming years, given the above-mentioned factors. The seven states including Andhra Pradesh (AP), Maharashtra, Punjab, Madhya Pradesh and Chhattisgarh, Gujarat, Tamil Nadu and Haryana account for usage of over 70 per cent crop protection chemicals in India; wherein Andhra Pradesh is a leading consumer of agrochemicals with a market share of 24 per cent.

Outlook

Source: <https://www.ibef.org/news/indian-agrochemicals-market-to-reach-us-63-billion-by-fy2020-report>
Indian agrochemicals market to reach US\$ 6.3 billion by FY2020

Indian agrochemical industry, which is estimated at \$ 4.4 billion in FY15, is expected to grow at 7.5 percent annually to reach \$ 6.3 billion by FY20, with domestic demand growing at 6.5 percent per annum and export demand at 9 percent per annum, according to a report jointly presented by Tata Strategic Management Group (TSMG) and FICCI at the latter's sixth National Conference on Agrochemicals 2016 in New Delhi.

The report - titled as 'Next generation Indian agriculture: Role of crop protection solutions' - was released by Hukumdev Narayan Yadav, chairman, Standing Committee of Parliament on Agriculture and Farmers Welfare.

"Agrochemicals play a critical role in ensuring food and nutrition security of the nation. With estimated 355 MMTPA (million metric tonne per annum) food grain requirement by 2030 from current 253 MMTPA, efficient usage of crop protection products and solutions for Indian agriculture are the need of the hour. In order to realise the true potential, industry, government and regulatory bodies need to work in tandem and embrace digital technologies to further improve farmer connect," commented Manish Panchal, senior practice head - chemicals & energy at Tata Strategic Management Group.

As per the report, the industry is dominated by insecticides accounting for 60 percent of the overall demand, followed by fungicides and herbicides contributing 18 percent and 16 percent, respectively.

The report highlights the changing food consumption patterns in India, demand patterns and future growth potential of crop protection industry in India. As per the report, there is a need of crop protection and crop enhancement solutions to overcome the challenges faced by Indian agriculture in ensuring food and nutritional security of the nation. To ensure sustainable agriculture in the country, it has also suggested adoption of the best global practices and the latest technologies which include agronomy, fertigation, seed treatment and biotechnology development.

The Indian agriculture sector is currently facing critical challenges like reduction in arable land, decreasing farm size, increasing pest attacks, low per hectare yield and a shift towards animal products consumption, all of which are leading to demand outpacing supply in the country's food chain. Agrochemicals could play a significant role in overcoming this imbalance.

Indian crop protection market is supported by strong growth drivers. Current consumption of crop protection products in India at 0.6 kg per hectares (ha), is much lower than the world average of 3 kg per ha. This offers immense opportunities

for future growth. With several products going off-patent globally, the sector is opening opportunities for generics, contract manufacturing & research for Indian players who can leverage their large scientific talent pool.

Despite the strong growth drivers, Indian agrochemicals industry faces challenges in terms of low awareness among farmers and rising sales of non-genuine products (approximately 25 percent by volume). With large number of end users spread across the vast geography, managing availability through a distribution network is a challenge for all the major players. A collaborative approach by the industry, government & regulatory bodies is the need of the hour to realise full potential of the agrochemicals industry.

SUMMARY OF OUR BUSINESS

Overview

Our Company is engaged in the business of manufacturing and marketing a range of agrochemicals. We have a pan-India presence, with integrated operations across research and development, manufacturing, marketing and distribution of a wide range of crop protection chemicals, public health and Animal Health solutions.

Initially we were engaged in synthetic pyrethroids and its intermediates. Synthetic pyrethroids are pesticides derived from naturally occurring pyrethrins and is synthetically made by industrial methods.

We manufacture technical products (active ingredients), intermediate products and formulations. Our pesticides range includes insecticides, herbicides, fungicides and public health products for pest control. We aim to provide innovative products to farmers that enhance farm efficiency and offer better crop solutions. We have products for all kinds of crops, vegetables and fruits. Our products viz Deltamethrin and Alphacypermethrin are now recommended and included in the WHO/FAO specifications. Our company has a well-balanced effluent treatment system for the solid, liquid and gaseous effluents and emission generated from the various processes.

We started our manufacturing activity with production of intermediate product CMAC (Cypermethrinic Acid Chloride). However after initial few years we started manufacturing Technical Products like, Cypermethrin, Alphacypermethrin, Deltamethrin, Permethrin, Lambda cylothrins etc in which CMAC was a main raw material. Therefore over the years we largely stopped selling CMAC in the market and production was primarily used for captive consumption for manufacturing Technical Products.

Other than the aforementioned crop protection products, we also produce certain plant growth/spreader products which provide the nutrients to plants for growth. The products include amino acids, gibberellic acid 0.001%L, seaweed extract.

Our major focus is on exports. We export our Products to more than 60 countries including Argentina, Belgium, Egypt, Ghana, Indonesia, Jordan, Malaysia, Nicaragua, Philippines, South Africa, Tunisia, Ukraine, Australia, Brazil, Europe, Hamburg, Iran, Kenya, Mexico, Nigeria, Poland, Turkey, Vietnam, Bangkok, China, France, Zimbabwe, Israel, Korea, Pakistan, Saudi Arabia, Taiwan, Uganda, Thailand, UK, Bangladesh, Colombia, Germany, Hongkong, Istanbul, Kyrgyzstan, New Zealand, Peru, Singapore, Middle East.

We have established more than 100 branded formulations in 20 states within India. We have more than 5000 dealers across India. We have 21 stock points across India. Our team's ability to identify customer's requirement, to provide world class service, ready responsiveness and proactive approach has helped our Company to gain trust of respected clients across the Globe. We have been exporting our products worldwide to various countries, thus traversing many boundaries. We have been participating in all important agrochemical exhibitions to showcase our products and to understand customer's requirements.

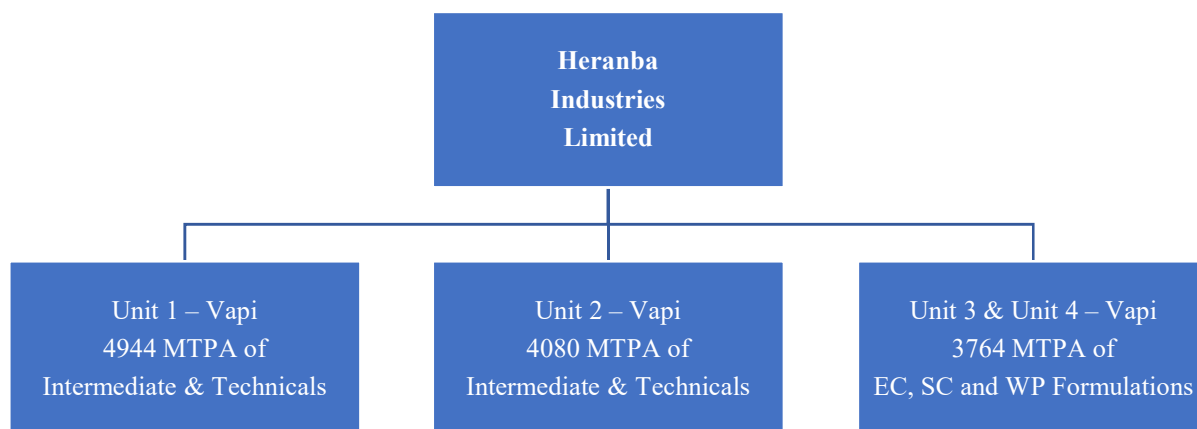

We have a full-fledged registration department with qualified personnel and data support as per GLP standards to meet each country's regulatory requirements. We have obtained products registrations in many countries.

Our product range is aimed at improving crop productivity, crop health, public health with an objective of providing innovative products to farmers to maximise their farm output and same is the outcome of our research and product development divisions.

We have consistently expanded our facilities, capacities and product mix investing in increasingly advanced technology and at the same time in the ongoing development and upgradation of products and processes that comply with the international standards and demands. Our quality control and research and development facility is well equipped with advanced equipment for chemical analysis, process design and thorough quality control. Every aspect of purchase, manufacturing and marketing revolves around the performance of the product, and we follow the "Zero Defect policy".

All the domestic branded products are sold and distributed during the agricultural seasons, Kharif and Rabi crop periods. Hence these are seasonal products sold mainly during May to September and January to March. In other months there are more of exports.

We have four fully integrated and modern manufacturing facilities with an In-house R&D facility for product development and improvisation. All 4 facilities are in the industrial belt of "Vapi", which is a prime Industrial Township in Gujarat, at a distance of 180 km from Mumbai. These facilities offer a range of Crop Protection chemicals, Public Health and Animal Health solutions. Our Company has a multi-product set up at four different sites/units in Vapi.

UNIT 1: This is our first manufacturing facility with the initial installed capacity of 1320 MTPA of Cypermethric Acid Chloride which is the basic intermediate used in the manufacture of technical grade synthetic pyrethroids. Subsequently the down stream Technical products like Cypermethrin, Deltamethrin, Alphacypermethrin, Lambda Cyhalothrin and Permethrin were established in this plant. Apart from these Pyrethroid products some other Technical products like Acephate, Glyphosate, Temephos, Profenophos, etc. were introduced mostly for catering to our formulated branded products which are distributed all over the country in the Farm sector as well as for export requirements. The current capacity of Unit 1 is 4944 MTPA of Intermediate & Technical products.

UNIT 2: (Export Oriented Unit) It has an installed capacity of 4080 MTPA of Cypermethric Acid Chloride, Cypermethric Acid, Cypermethrin and Alpha Cypermethrin per annum. This plant manufactures high quality derivatives of Cypermethric Acid Chloride as per customer's requirement.

UNIT 3: It is ISO 9001-2008 certified ultra-modern formulation unit, meeting the requirement of the EC (Emulsifiable Concentrate), SC (Suspension Concentrate) and WP (Wettable powders) formulations to cater to the local Indian market as well as for export also offering toll manufacturing facility. Unit 3 produces mostly liquid formulations with filling and packing lines.

UNIT 4: This unit produces only powder formulations and these formulated products are packed in Heranba's Brands, each product in a particular brand name in various pack sizes as per the required dosage for each crop per acre.

Our manufacturing facilities are well equipped with modern equipment, adhering to safety and environmental standards. All the units have fully equipped Quality Control laboratory to check the quality of Input materials, In-Process materials and finished goods. Illustration of Book Building Process and Price Discovery Process *(Investors should note that this example is solely for illustrative purposes and is not specific to the Offer; it also excludes bidding by Anchor Investors).*

Bidders can bid at any price within the price band. For instance, assume a price band of ₹20 to ₹24 per equity share, Offer size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price(₹)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Offer the desired number of shares is the price at which the book cuts off, i.e., ₹22 in the above example. The issuer, in consultation with the Selling Sahreholder and the BRLM will finalize the Offer price at or below such cut-off price, i.e., at or below ₹22/-. All bids at or above this Offer price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

1. Check eligibility for making a bid (refer the section titled “Offer Procedure” on page 285);
2. Ensure that you have an active demat account and the demat account details are correctly mentioned in the Bid-cum-Application Form.
3. Ensure correctness of your PAN, DP ID and Client ID mentioned in the Bid-cum-Application Form. Based on these parameters, the Registrar to the Offer will obtain the Demographic Details of the Bidders from the Depositories.
4. Except for Bids on behalf of the Central or State Government and the officials appointed by the courts and by investors residing in the state of Sikkim, for Bids of all values ensure that you have mentioned your PAN allotted under the IT Act in the Bid-cum-Application Form. The exemption for the Central or State Government and the officials appointed by the courts and for investors residing in the State of Sikkim is subject to the Depository Participants’ verifying the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims. In accordance with the SEBI (ICDR) Regulations, the PAN would be the sole identification number for participants transacting in the securities market, irrespective of the amount of the transaction;
5. Ensure that the Bid-cum-Application Form is duly completed as per instructions given in the Red Herring Prospectus and in the Bid-cum-Application Form.
6. ASBA Bidders can submit their Bids by submitting Bid-cum-Application Forms, either in physical or electronic mode, to the SCSB with whom the ASBA Account is maintained or in physical form to the Designated Intermediaries. ASBA Bidders should ensure that their bank accounts have adequate credit balance at the time of submission to the SCSB to ensure that their Bid-cum-Application Form is not rejected;

Chemicals Sector

Source :- chemical and petrochemical statistics at a glance-2017

Website :- www.chemicals.nic.in

Chemical and petrochemical sector is one of the pioneering sectors having bearing on day to day needs of the society. Presence of Chemicals and Petrochemicals can be seen in everyday life of the people at large. The share of GVA of this sector in manufacturing sector is about **7.21% and about 1.2 %** in National G.V.A.

The production of Chemical and Petrochemical products generally found growing consistently over the years. The annual growth during 2016-17 is 3.54% over preceding year with CAGR of 2.75 % over a period of 8 years in case of Major Chemicals. The annual growth of Basic Major Petrochemicals is 4.06 over preceding year with CAGR of 5.17% during the same period. The growth is higher in Production of Basic Major Petrochemicals as compared to growth in production of Major Chemicals.

It is further observed that there is still scope to increase production, as substantial installed capacity is unutilized in both the subsectors. The utilization of installed capacity is in the range of **80% in major Chemicals like Alkali and Inorganic Chemicals**. Micro study of the sector indicate that huge unutilized installed capacity is seen in case of **Organic Chemicals (38%), Synthetic Rubber (33%) and Dyes and Pigments (31%)**. The statistics reveals that capacity is lying unutilized more in case of Organic Chemicals and Dyes and Pigments compared to products like Alkal and inorganic chemicals.

It appears that there is need to look in to the reasons for high unutilized Installed capacity in case of some of the products in the sector. In-depth study of the reasons for unutilized capacity may highlight other relevant issues viz. Specifications, Standardization and Mandation etc. along with enhanced requirement of Research and Development facilities.

The trade deficit in Chemical and Petrochemical Sector (comprising chapter 28,29,30,31,32,38,39, 4002, 54,55 of HS code) is 71,429 Crore (INR) as per figures available on DGCIS, portal as on 21.07.2017. The trade deficit in respect of Major Chemical and Petrochemical Products being monitored by DCPC is around 39,730 Crore (INR) as per figures derived from the data received from DGCIS, Kolkata.

In respect of Major Chemicals at group level, it is observed on the basis of products monitored by his Department that Alkali Chemicals, Organic Chemicals and Inorganic Chemicals are trade deficit, whereas Dyes & Pigments are trade surplus during 2016-17. However in respect of Major Petrochemicals at group level Polymers, Fibre Intermediates, Synthetic rubber, Synthetic Detergent Intermediates and Other Petro-based Chemicals are trade deficit, whereas Synthetic Fibre, Performance Plastics, Aromatics and Olefins are trade surplus during the same period. This aggregates to overall trade surplus in Major Chemicals and overall trade deficit in Major Petrochemicals resulting in to net trade deficit in Chemical and Petrochemical sector.

Chemicals can be broadly divided into the following sub-groups

i. Basic Chemicals

Chemicals such as organic and inorganic chemicals, bulk petrochemicals, other chemical intermediates, plastic resins, synthetic rubber, man-made fibers, dyes and pigments, printing inks are basic chemicals. These are also known as commodity chemicals.

ii. Specialty Chemicals

Specialty Chemicals, also known as performance chemicals, are low-volume but high-value compounds. These chemicals are derived from basic chemicals and are sold on the basis of their functions. For example, paint, adhesives,

electronic chemicals, water management chemicals, oilfield chemicals, flavors and fragrances, rubber additives, paper additives, industrial cleaners and fine chemicals. Sealants, coatings, catalysts come under this category.

iii. Agro - Chemicals

Chemicals which essentially are meant for protecting agriculture crops against insects and pests are covered under this sub-group.

Agrochemicals

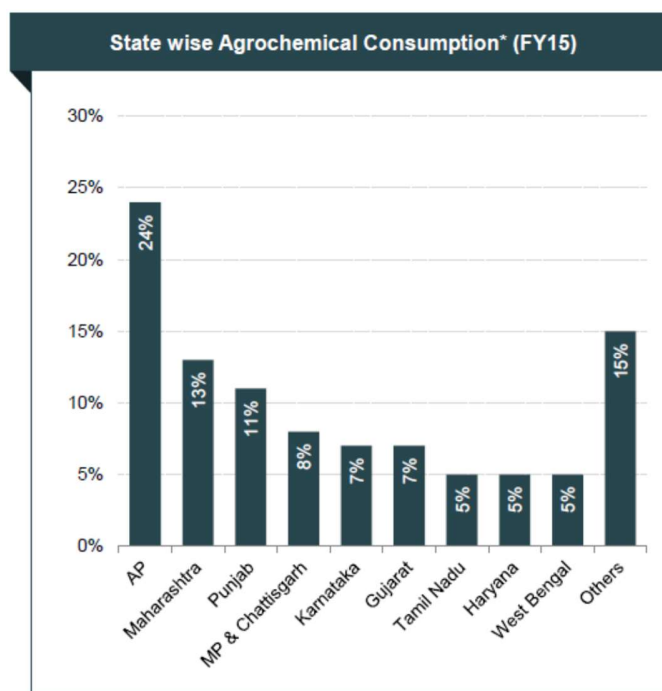

Source: IBEF, Agriculture and Allied Industries, February 2018

India is the 4th largest producer of agrochemicals, globally and ranks 4th in terms of production of crop protection chemicals. The market in India is expected to reach to US\$ 7.5 billion by FY19 and register exports of about 50 per cent of value of Indian crop protection industry. In 2015, India became one of the largest exporters of agrochemicals globally. Agrochemical companies in India witnessed a CAGR of 10 per cent from FY13-17E. Around 50 per cent of this growth was based on exports.

Agrochemical industry in India is set to grow at a significant pace; increasing population, decreasing per capita availability of arable land and focus on increasing agricultural yield will fuel the demand for agrochemicals. India's per hectare agrochemical consumption is set to rise in the coming years, given the above-mentioned factors. The seven states including Andhra Pradesh (AP), Maharashtra, Punjab, Madhya Pradesh and Chhattisgarh, Gujarat, Tamil Nadu

and Haryana account for usage of over 70 per cent crop protection chemicals in India; wherein Andhra Pradesh is a leading consumer of agrochemicals with a market share of 24 per cent.

Outlook

Source: <https://www.ibef.org/news/indian-agrochemicals-market-to-reach-us-63-billion-by-fy2020-report>

Indian agrochemical industry, which is estimated at \$ 4.4 billion in FY15, is expected to grow at 7.5 percent annually to reach \$ 6.3 billion by FY20, with domestic demand growing at 6.5 percent per annum and export demand at 9 percent per annum, according to a report jointly presented by Tata Strategic Management Group (TSMG) and FICCI at the latter's sixth National Conference on Agrochemicals 2016 in New Delhi.

The report - titled as 'Next generation Indian agriculture: Role of crop protection solutions' - was released by Hukumdev Narayan Yadav, chairman, Standing Committee of Parliament on Agriculture and Farmers Welfare.

"Agrochemicals play a critical role in ensuring food and nutrition security of the nation. With estimated 355 MMTPA (million metric tonne per annum) food grain requirement by 2030 from current 253 MMTPA, efficient usage of crop protection products and solutions for Indian agriculture are the need of the hour. In order to realise the true potential, industry, government and regulatory bodies need to work in tandem and embrace digital technologies to further improve farmer connect," commented Manish Panchal, senior practice head - chemicals & energy at Tata Strategic Management Group.

As per the report, the industry is dominated by insecticides accounting for 60 percent of the overall demand, followed by fungicides and herbicides contributing 18 percent and 16 percent, respectively.

The report highlights the changing food consumption patterns in India, demand patterns and future growth potential of crop protection industry in India. As per the report, there is a need of crop protection and crop enhancement solutions to overcome the challenges faced by Indian agriculture in ensuring food and nutritional security of the nation. To ensure sustainable agriculture in the country, it has also suggested adoption of the best global practices and the latest technologies which include agronomy, fertigation, seed treatment and biotechnology development.

The Indian agriculture sector is currently facing critical challenges like reduction in arable land, decreasing farm size, increasing pest attacks, low per hectare yield and a shift towards animal products consumption, all of which are leading to demand outpacing supply in the country's food chain. Agrochemicals could play a significant role in overcoming this imbalance.

Indian crop protection market is supported by strong growth drivers. Current consumption of crop protection products in India at 0.6 kg per hectares (ha), is much lower than the world average of 3 kg per ha. This offers immense opportunities for future growth. With several products going off-patent globally, the sector is opening opportunities for generics, contract manufacturing & research for Indian players who can leverage their large scientific talent pool.

Despite the strong growth drivers, Indian agrochemicals industry faces challenges in terms of low awareness among farmers and rising sales of non-genuine products (approximately 25 percent by volume). With large number of end users spread across the vast geography, managing availability through a distribution network is a challenge for all the major players. A collaborative approach by the industry, government & regulatory bodies is the need of the hour to realise full potential of the agrochemicals industry.

Overview

Our Company is engaged in the business of manufacturing and marketing a range of agrochemicals. We have a pan-India presence, with integrated operations across research and development, manufacturing, marketing and distribution of a wide range of crop protection chemicals, public health and Animal Health solutions.

Initially we were engaged in synthetic pyrethroids and its intermediates. Synthetic pyrethroids are pesticides derived from naturally occurring pyrethrins and is synthetically made by industrial methods.

We manufacture technical products (active ingredients), intermediate products and formulations. Our pesticides range includes insecticides, herbicides, fungicides and public health products for pest control. We aim to provide innovative products to farmers that enhance farm efficiency and offer better crop solutions. We have products for all kinds of crops, vegetables and fruits. Our products viz Deltamethrin and Alphacypermethrin are now recommended and included in the WHO/FAO specifications. Our company has a well-balanced effluent treatment system for the solid, liquid and gaseous effluents and emission generated from the various processes.

We started our manufacturing activity with production of intermediate product CMAC (Cypermethrinic Acid Chloride). However after initial few years we started manufacturing Technical Products like, Cypermethrin, Alphacypermethrin, Deltamethrin, Permethrin, Lambda cylothrins etc in which CMAC was a main raw material. Therefore over the years we largely stopped selling CMAC in the market and production was primarily used captive consumption for manufacturing Technical Products.

Other than the aforementioned crop protection products, we also produce certain plant growth/spreader products which provide the nutrients to plants for growth. The products include amino acids, gibberellic acid 0.001%L, seaweed extract.

Our major focus is on exports. We export our Products to more than 60 countries including Argentina, Belgium, Egypt, Ghana, Indonesia, Jordan, Malaysia, Nicaragua, Philippines, South Africa, Tunisia, Ukraine, Australia, Brazil, Europe, Hamburg, Iran, Kenya, Mexico, Nigeria, Poland, Turkey, Vietnam, Bangkok, China, France, Zimbabwe, Israel, Korea, Pakistan, Saudi Arabia, Taiwan, Uganda, Thailand, UK, Bangladesh, Colombia, Germany, Hongkong, Istanbul, Kyrgyzstan, New Zealand, Peru, Singapore, Middle East.

Domestically we cater to the customers all over India with our extensive dealership, stockist network and skilled field sales force. We have established more than 100 branded formulations in 20 states within India. We have more than 5000 dealers across India. We have 21 stock points across India. Our team's ability to identify customer's requirement, to provide world class service, ready responsiveness and proactive approach has helped our Company to gain trust of respected clients across the Globe. We have been exporting our products worldwide to various countries, thus traversing many boundaries. We have been participating in all important agrochemical exhibitions to showcase our products and to understand customer's requirements.

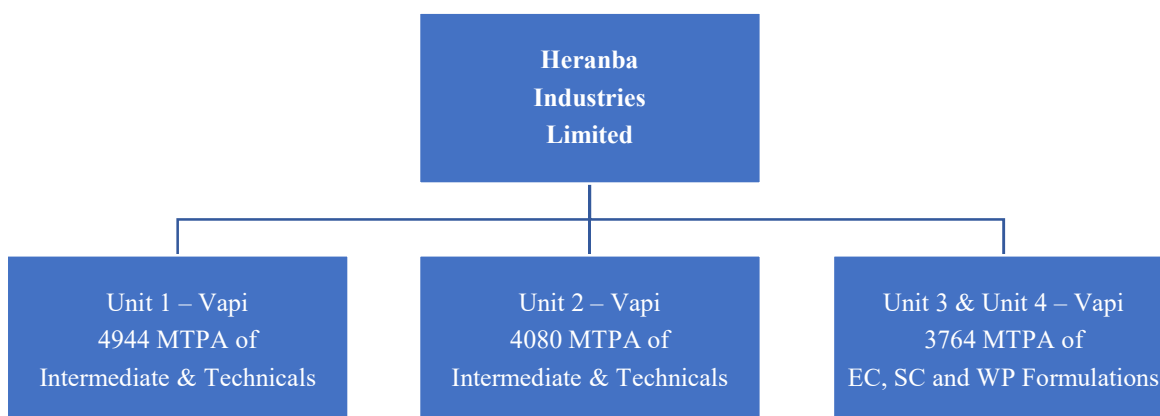

We have a full-fledged registration department with qualified personnel and data support as per GLP standards to meet each country's regulatory requirements. We have obtained products registrations in many countries.

Our product range is aimed at improving crop productivity, crop health, public health with an objective of providing innovative products to farmers to maximise their farm output and same is the outcome of our research and product development divisions.

We have consistently expanded our facilities, capacities and product mix investing in increasingly advanced technology and at the same time in the ongoing development and upgradation of products and processes that comply with the international standards and demands. Our quality control and research and development facility is well equipped with advanced equipment for chemical analysis, process design and thorough quality control. Every aspect of purchase, manufacturing and marketing revolves around the performance of the product, and we follow the "Zero Defect policy".

All the domestic branded products are sold and distributed during the agricultural seasons, Kharif and Rabbi crop periods. Hence these are seasonal products sold mainly during May to September and January to March. In other months there are more of exports.

We have four fully integrated and modern manufacturing facilities with an In-house R&D facility for product development and improvisation. All 4 facilities are in the industrial belt of "Vapi", which is a prime Industrial Township in Gujarat, at a distance of 180 km from Mumbai. These facilities offer a range of Crop Protection chemicals, Public Health and Animal Health solutions. Our Company has a multi-product set up at four different sites/units in Vapi.

UNIT 1: This is our first manufacturing facility with the initial installed capacity of 1320 MTPA of Cypermethric Acid Chloride which is the basic intermediate used in the manufacture of technical grade synthetic pyrethroids. Subsequently the down stream Technical products like Cypermethrin, Deltamethrin, Alphacypermethrin, Lambda Cyhalothrin and Permethrin were established in this plant. Apart from these Pyrethroid products some other Technical products like Acephate, Glyphosate, Temephos, Profenophos, etc. were introduced mostly for catering to our formulated branded products which are distributed all over the country in the Farm sector as well as for export requirements. The current capacity of Unit 1 is 4944 MTPA of Intermediate & Technical products.

UNIT 2: (Export Oriented Unit) It has an installed capacity of 4080 MTPA of Cypermethric Acid Chloride, Cypermethric Acid, Cypermethrin and Alpha Cypermethrin per annum. This plant manufactures high quality derivatives of Cypermethric Acid Chloride as per customer's requirement.

UNIT 3: It is ISO 9001-2008 certified ultra-modern formulation unit, meeting the requirement of the EC (Emulsifiable Concentrate), SC (Suspension Concentrate) and WP (Wettable powders) formulations to cater to the

We have a two- way plan to increase the production capacity:

A) Capacity expansion at existing area :

We plan to create more production capacity at existing Unit I area by installing more reactors and developing new lines for more Technical Products. Further capacity enhancement in terms of Packaging has already been done at our formulation Unit by Shifting powder formulations at Unit No. 4 in the year 2017-18

Put together capacity expansion at Unit No 1 and Unit 3 will give company the base to achieve its Projected capacity for next two years.

B) Aquisition of New Project Sites

Our Company has recently acquired a land at Sarigam GIDC of about 13.5 acres to put up new production facilities for both Technical production as well as formulations. We are in the process of shifting our current formulation set up from Unit 3 to this location.

Further we have also acquired a Land of about 7 Acres at GIDC Sykha Dahej for future expansion. Both the lands were acquired by our company from its internal accruals.

Our Competitive Strengths

1. We manufacture wide range of products.

We have a diversified portfolio of products, to meet all kind of requirements of our customers, all across the world. Our Company offers a wide range of products, including technical products (insecticides, herbicides and fungicides), intermediate products and formulations and other public health products. We have developed a strong core product

line, the wide product range allows our company to focus on those product lines while still offering enough variety in functionality or usage to appeal to a wide range of potential customers. This also diversify the risk of dependence on single or few products as the industry in which we operate is highly regulated and have been instances of various state and central Governments banning certain chemicals.

2. Awards & Recognition

In the past we have received various awards which include, Rashtriya Udyog rattan Award from India International Council for Industries and Trade; Star Export House (Recognition certificate) from Jt. Director of Foreign Trade, Ministry of Commerce and Industry; Chemexcil – Second Award for Outstanding Export Performance, Ministry of Commerce and Industry amongst others. This speaks volume about the quality work being done by our Company and is an motivation for us to continue to excel in our operations.

3. Technical Capabilities

We have constantly endeavoured to bring new and improved products into the Indian market in line with the technological developments. We have a dedicated team for research and Development who continuously endeavour for new product development. Due to our technology we have wide range of pyrethroid products. We believe we have the technical capabilities to implement any sophisticated technical, intermediate or formulation range of products.

4. Strategic Location of manufacturing facilities

Location of Manufacturing Facility is of importance as it helps in designing the cost structure and lead time for delivery. We procure raw materials from indigenous manufacturers as well as from abroad. Our facilities are well connected and are on the strategically important NH8 in Vapi, which is well connected with a network of transport facilities like rail and road operating all over India and is hub for agrochemical and chemical industry. This helps our logistics department to ensure timely and cost-efficient delivery.

5. Proven track record of our Company and our Promoters

We and our Promoters believe we have a proven track record in the chemical industry and are experienced in managing the chemical business. Our Promoters have adequate experience in the Present & proposed Products. Our management team has a sound understanding of the business. The senior management team has experience in related industries and is equipped to handle future challenges. We have an excellent and energetic team of more than 150 sales and marketing people looking after Indian and overseas marketing, who are always on the job and continuously travelling. We believe that our Promoters have a demonstrated track record of growing the business, securing financing and successfully achieving the growth plans. With the 2nd generation of management also now actively involved in the day to day activities with having required qualifications, we get a right mix of youth and experience at our top level management. Our Business Strategy

1. Increase in market share

We are catering to a diversified client base to meet their growing demands. At present, we supply our products to most of the Agro Chemical companies. We have planned to pursue aggressive promotional campaign supported by a competitive pricing strategy and increasing our product range.

2. Market development:

We also plan to set up new distribution channels in domestic and overseas markets which can source business and help in expanding the customer base. We intend to strengthen our design and development facilities to offer customized and new products. Our marketing team is continuous travelling within India and all across the world to meet customers, strengthen business relation with them and exploring new markets, new customers and new opportunities.

3. Entering into US and Europe Markets

As part of our future and further growth strategy, we intend to enter into US and Europe. We are in the process of making the applications for getting our products registered in US and few European countries to begin with. We believe since our products viz Deltamethrin and Alphacypermethrin are now recommended and included in the WHO/FAO specifications, this will give us an added advantage in terms of acceptability of our products.

4. Technical and Marketing Collaboration

We are looking for technical and marketing partner for our Company. Technical partnership is an ideal way to access new technologies without expending resources. These collaborations will give us access to latest technology, new and latest products and new markets. We believe that these partnerships will result into increase of revenue, expansion of geographical reach and will also benefit in terms of resource sharing.

5. Innovation and Product Development

We believe that key factor to sustain, strengthen and succeed in our business, lies in our ability to innovate new products and improvise our existing products. Our continuous process and product improvement helps deliver value with topmost quality to our customers. Product developments is required for growing our existing domestic and exports market and also to increase penetration into existing customers.

6. Strengthening our position in Public Health Products

As part of our further growth strategy we intend to focus on marketing of our public health products. These products include general insect control, termiticide, larvicide, indoor residual spray, rodenticide and cockroach gel. Currently these products are mainly sold in Gujarat and Maharashtra, we intend to increase the sales of these products to other cities and states.

Public Health products manufactured by our company are supplied in both Government Tenders and to Pest control companies. In last few years, our company has bagged many government tenders from Health department of Central government and State Governments as well as municipal corporations orders. We also plan to strengthen this segment.

Our Company is using the latest technology in all production systems for achieving high efficiency in the process in terms of yields at all stages for arriving at world class end products. The process equipment are carefully designed considering the process intricacies and all safety parameters to match the local and international standards. Our Company is equipped with modern and latest technology. Our R&D Laboratory is engaged in developing new products apart from upgrading the existing standards to attain new benchmarks and developing cost effective technologies to provide new generation agro chemicals with optimum yield. The R&D team has expertise in the products we manufacture. The process development for an identified product is done in step by step manner after a thorough literature survey, followed by the laboratory trials, pilot plant trials and then finally scaling it up to the plant size. We have testing facilities and application equipment to evaluate the product's performance. Our Company has a well-balanced effluent treatment system for the solid, liquid and gaseous effluents and emission generated from the various processes. All the necessary clearances have been obtained by our company from the competent authorities.

We have not entered into any technology agreement. Our Company uses proven technology for manufacturing our products, which we intend to continue for the new Project also.

Collaborations

We have not entered into any technical or other collaboration.

R & D FACILITY

We commenced manufacturing activities in Agro chemical products in the year 1995. The first product was an intermediate called Cypermethric Acid Chloride which is the key input material for variety of Pyrethroid class of pesticides. The process for this intermediate was established with the active involvement and support of our R & D laboratory.

Subsequently the downstream pesticide products like Cypermethrin, Alpha Cypermethrin, Permethrin, Deltamethrin etc were introduced one by one as forward integration. All these developments were the result of our R & D team efforts in first developing and modifying the process to suit our plant requirements.

In due course of time to compete in the market place there were continuous efforts in process improvement and improvisation for better efficiency with improved yields and quality upgradation as well. This helped us to be at par with other players in the Agrochemical Industry.

Apart from above several other Insecticides, Herbicides & Public Health products were developed in the subsequent years with our R&D efforts in each unit. Formulation products of all our technical and also outsourced technical were established by our own laboratory.

We do not have a separate R & D center as of now. Each of our manufacturing units have independent process development laboratories well equipped with all laboratory scale reaction vessels, utilities and testing facilities with most modern instruments. We are planning for an independent R & D center in our new venture Sarigam in due course of time. Since R & D is the backbone of our future growth we assign topmost priority to the investment in this area.

We strongly believe in continuous improvement in quality and efficiency through innovations to facilitate affordable products to the end users. Competition

The Indian agrochemicals market is highly fragmented in nature with many formulators. The competition is fierce with large number of organized sector players and significant share of spurious pesticides. The market has been witnessing mergers and acquisitions with large players buying out small manufacturers.

Like any other company, our Company also faces competition from both multinationals, having a big image in the industry and domestic corporate and other fragmented/marginal players

Approach to Marketing and Marketing Set-up

We have a dealer and distribution network. Our Company conducts its marketing arrangement through a dedicated sales & marketing team. Our Promoters have more than two decades of experience in this field. They have developed strong relationships with customers over the years right from Multinational Companies to big Indian Companies where Quality and timely delivery is of utmost importance. We build long term relationships with our Customers. We grow with our Customers and help them to help us. Special measures are taken to ensure customer acquisition.

Future Prospects

India is expected to achieve the ambitious goal of doubling farm income by 2022. The agriculture sector in India is expected to generate better momentum in the next few years due to increased investments in agricultural infrastructure

such as irrigation facilities, warehousing and cold storage. Furthermore, the growing use of genetically modified crops will likely improve the yield for Indian farmers. India is expected to be self-sufficient in pulses in the coming few years due to concerted efforts of scientists to get early-maturing varieties of pulses and the increase in minimum support price. The government of India targets to increase the average income of a farmer household at current prices to Rs 219,724 (US\$ 3,420.21) by 2022-23 from Rs 96,703 (US\$ 1,505.27) in 2015-16.

Indian agrochemical industry, which is estimated at \$ 4.4 billion in FY15, is expected to grow at 7.5 percent annually to reach \$ 6.3 billion by FY20, with domestic demand growing at 6.5 percent per annum and export demand at 9 percent per annum, according to a report jointly presented by Tata Strategic Management Group (TSMG) and FICCI at the latter's sixth National Conference on Agrochemicals 2016 in New Delhi.

"Agrochemicals play a critical role in ensuring food and nutrition security of the nation. With estimated 355 MMTPA (million metric tonne per annum) food grain requirement by 2030 from current 253 MMTPA, efficient usage of crop protection products and solutions for Indian agriculture are the need of the hour. In order to realise the true potential, industry, government and regulatory bodies need to work in tandem and embrace digital technologies to further improve farmer connect," commented Manish Panchal, senior practice head - chemicals & energy at Tata Strategic Management Group. As per the report, the industry is dominated by insecticides accounting for 60 percent of the overall demand, followed by fungicides and herbicides contributing 18 percent and 16 percent, respectively.

The report highlights the changing food consumption patterns in India, demand patterns and future growth potential of crop protection industry in India. As per the report, there is a need of crop protection and crop enhancement solutions to overcome the challenges faced by Indian agriculture in ensuring food and nutritional security of the nation. To ensure sustainable agriculture in the country, it has also suggested adoption of the best global practices and the latest technologies which include agronomy, fertigation, seed treatment and biotechnology development.

The Indian agriculture sector is currently facing critical challenges like reduction in arable land, decreasing farm size, increasing pest attacks, low per hectare yield and a shift towards animal products consumption, all of which are leading to demand outpacing supply in the country's food chain. Agrochemicals could play a significant role in overcoming this imbalance. Indian crop protection market is supported by strong growth drivers. Current consumption of crop protection products in India at 0.6 kg per hectares (ha), is much lower than the world average of 3 kg per ha. This offers immense opportunities for future growth. With several products going off-patent globally, the sector is opening opportunities for generics, contract manufacturing & research for Indian players who can leverage their large scientific talent pool.

Despite the strong growth drivers, Indian agrochemicals industry faces challenges in terms of low awareness among farmers and rising sales of non-genuine products (approximately 25 percent by volume). With large number of end users spread across the vast geography, managing availability through a distribution network is a challenge for all the major players. A collaborative approach by the industry, government & regulatory bodies is the need of the hour to realise full potential of the agrochemicals industry.

China Impact

President Xi Jinping's drive to raise environmental protection and air quality as a priority. Statistics for 2017 are quite startling and indicate the scale of the programme, suggesting that 40% of China's total manufacturing capacity was temporarily shuttered last year, and 80,000 factories charged with breaching emissions levels. The global specialty chemicals market is likely to expand by 5.2% on a compounded basis from 2013-2018, and is estimated to jump to \$761 billion by 2018 from \$619 billion in 2014, said the report. "Business is shifting to India from China. This is mainly on account of stringent effluent norms and increasing wage costs in China.

The Insecticides Act regulates the (i) registration; (ii) licensing; and (iii) quality-control of insecticides.

Registration: The definition of insecticides includes fungicides and weedicides. Any person who desires to import or manufacture any insecticide is required to apply to the registration committee under the Insecticides Act, for the registration of such an insecticide. The functions of the registration committee include registering insecticides after scrutinizing their formulae and verifying claims made by the importer or the manufacturer, as the case may be, as regards their efficacy and safety to human beings and animals. The registration is granted by a central authority and is effective throughout India.

Licensing: Any person who desires to manufacture or sell, stock or exhibit for sale or distribute any insecticide, or to undertake commercial pest control operations with the use of any insecticide may make an application to the licensing officer for the grant of a license under the Insecticides Act. Our Company is required to obtain a separate license for each place in which we manufacture, sell or distribute our products. The license granted may be revoked, suspended or amended, *inter alia*, for misrepresentation of an essential fact and failure to comply with the conditions subject to which the license was granted. The validity of the license is for a period of two years and every such license is required to be renewed within three months from the date of its expiry on payment of late fees.

Quality control: If based on inspection and analyses by the concerned statutory authority, the use of an insecticide or a batch thereof is likely to lead to such risk to human beings or animals, the Central Government or the State Government of such insecticides may prohibit its sale, distribution or use, by notification, for a specified period.

Penalties: Contravention of the Insecticides Act is punishable with imprisonment or fine or both, with enhanced punishment for repeat offences. Similarly, a person may be imprisoned for a period of six months to three years depending upon the nature of the offence. Further, the prescribed officer under the Insecticide Act has the power to stop the distribution, sale or use of an insecticide for a specified period which he has reason to believe is being distributed, sold or used in contravention of the Insecticides Act. Additionally, if any person is

convicted under the Insecticide Act, the stock of insecticide in respect of which the contravention has been made is liable to be confiscated.

The Insecticides Rules assign functions to the CIB in addition to those assigned under the Insecticides Act, including specifying the uses of the classification of insecticides on the basis of their toxicity as well as their being suitable for aerial application; advising on the tolerance limits for insecticides, residues and an establishment of minimum intervals between the application of insecticides and harvest in respect of various commodities; and specifying the shelf-life of insecticides. Further, the Insecticides Rules assign additional functions to the registration committee. These include specifying the precautions to be taken against poisoning through the use or handling of insecticides and carrying out such other incidental or consequential matters necessary for carrying out the functions assigned to it under the Insecticides Act or Insecticides Rules. In terms of the Insecticides Rules, the functions of the Central Insecticides Laboratory, established under the Insecticides Act, include analysing samples of insecticides and insecticide residues and determining the efficacy and toxicity of insecticides. The Insecticides Rules make detailed provisions for manufacture and/or sale of insecticides, *inter alia*, the registration of insecticides, grant of license to manufacture insecticides and specifications relating to packaging, transportation and labeling of insecticides, the appointment, powers, duties and functions of insecticide analysts and inspectors.

As per the definition of 'explosives' under the Act, any substance, whether a single chemical compound or a mixture of substances, whether solid or liquid or gaseous, used or manufactured with a view to produce a practical effect by explosion or pyrotechnic effect shall fall under the Act. The Central Government may, for any part of India, make rules consistent with this Act to regulate or prohibit, except under and in accordance with the conditions of a licence granted as provided by those rules, the manufacture, possession, use sale, transport, import and export of explosives, or any specified class of explosives. Extensive penalty provisions have been provided for manufacture, import or export, possession, usage, selling or transportation of explosives in contravention of the Act.

- ii. Ind AS 115 - Revenue from Contracts with Customers

In March 2018, the Ministry of Corporate Affairs has notified the Companies (Indian Accounting Standards) Amended Rules, 2018 (“amended rules”). As per the amended rules, Ind AS 115 “Revenue from contracts with customers” supersedes Ind AS 11, “Construction contracts” and Ind AS 18, “Revenue” and is applicable for all accounting periods commencing on or after 1 April 2018. Ind AS 115 introduces a new framework of five step model for the analysis of revenue transactions. The model specifies that revenue should be recognised when (or as) an entity transfer control of goods or services to a customer at the amount to which the entity expects to be entitled. Further the new standard requires enhanced disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from the entity’s contracts with customers. The new revenue standard is applicable to the Company from 1 April 2018. The new revenue standard will supersede all current revenue recognition requirements under Ind AS. The Company is evaluating the requirements of the amendment and the impact on the financial statements. The effect on adoption of Ind AS 115 is expected to be insignificant”

Note 3: Basis of Preparation of Financial Statements

The financial statements of the Company have been prepared to comply in all material respects with the Indian Accounting Standards (“Ind AS”) notified under the Companies (Accounting Standards) Rules, 2015. The financial statements for all periods upto and including year ended 31 March 2017 were prepared in accordance with the Companies (Accounting Standards) Rules, 2006 notified under Section 133 of the Companies Act (“the Act”), read with Rule 7 of the Companies (Accounts) Rules, 2014 (as amended) (“previous GAAP”). The financial statements for the year ended 31st March, 2017 are the first financial statements prepared by the Company in accordance with Ind AS.

The financial statements have been prepared on accrual basis and under the historical cost convention with the exception of certain financial assets and liabilities which have been measured at fair value.

All the assets and liabilities have been classified as current or non-current, wherever applicable, as per the operating cycle of the Company as per the guidance set out in Schedule III to the Act.

The Company’s financial statements are reported in Indian Rupees, which is also the Company’s functional currency.

I. Significant accounting judgements, estimates and assumptions:

The preparation of financial statements in conformity with the recognition and measurement principles of Ind AS requires management to make judgements, estimates and assumptions that affect the reported balances of revenues, expenses, assets and liabilities and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Estimates and assumptions

The estimates and judgments used in the preparation of the financial statements are continuously evaluated by the Company and are based on historical experience and various other assumptions and factors (including expectations of future events) that the Company believes to be reasonable under the existing circumstances. Differences between actual results and estimates are recognised in the period in which the results are known/materialised. The said estimates are based on the facts and events, that existed as at the reporting date, or that occurred after that date but provide additional evidence about conditions existing as at the reporting date.

The areas involving critical estimates or judgements are:-

Estimation of defined benefit obligation,
Impairment of financial asset such as trade receivables,
Impairment of Non- financial Assets, and
Estimation of Tax Expense and Liability

Summary of Significant Accounting Policies

II. Revenue Recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured, regardless of when the payment is being made. Revenue is measured at the fair value of the consideration received or receivable, taking into account contractually defined terms of payment and excluding taxes or duties collected on behalf of the government.

Revenue is stated inclusive of excise duty and excludes sales tax/ value added tax (VAT) / Goods & Service Tax (GST).

The specific recognition criteria described below must also be met before revenue is recognised:-

A. Sale of goods: -

Sales are recognised when significant risk and rewards of ownership are transferred to the customer, in case of domestic customer, generally sales take place when goods are dispatched or delivery is handed over to the transporter. In case of export customers, generally sales take place when goods are shipped onboard based on bill of lading.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts, volume rebates and cash discounts.

B. Interest and dividend: -

Interest income including income arising on other instruments are recognised on time proportion basis using the effective interest rate method.

III. Export Benefits

The benefit accrued under the Duty Drawback, Merchandise Export Incentive Scheme and other schemes as per the Import and Export Policy in respect of exports made under the said schemes is included as 'Export Incentives' under the head 'Other operating revenue'.

IV. Property Plant and Equipment, Investment Property and Depreciation / Amortisation: -

- A. Items of Property, plant and equipment including Capital-work in-progress are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Such cost includes the cost of replacing part of the plant and equipment and borrowing costs for long-term construction projects if the recognition criteria are met. Subsequent expenditure related to an item of fixed asset is added to its book value only if it increases the future benefits from the existing asset beyond its previously assessed standard of performance. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognized in statement of profit or loss as incurred.
- B. Depreciation is provided based on useful life of the assets as prescribed in Schedule II to the Companies Act, 2013. Depreciation on additions to assets or on sale/disposal of assets is calculated pro-rata from the month of such addition, or upto the month of such sale/disposal, as the case may be.

Asset Category	Estimated useful life (in Years)
Plant & Machinery	25
Servers and networks	6
Computer desktops and laptops	3
Laboratory Equipment's	10
Office Equipment's	5
Plumbing and Piping	25
Electrical Installation	10
Factory Building	30
Non-Factory Buildings	60
Vehicles	6
Furniture and Fixture	10
Leasehold Land	Over Primary Lease period

The residual values, useful lives and methods of depreciation of property plant equipment are reviewed at each financial year and adjusted prospectively, if appropriate.

- C. On transition to Ind AS, the Company has opted to continue with the carrying values measured under the previous GAAP as at 1st April, 2016 of its Property, Plant and Equipment and use that carrying value as the deemed cost on the date of transition i.e. 1st April, 2016.

V. Financial Instruments: -

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

A. Financial Assets: -

- i. Recognition and initial measurement: -

Trade Receivables are initially recognised when they are originated. All other financial assets are initially recognised when the Company becomes party to the contractual provisions of the instrument. All financial assets other than those measured subsequently at fair value through profit and loss, are recognised initially at fair value plus transaction costs that are attributable to the acquisition of the financial asset.

ii. Classification and Subsequent measurement: -

For purposes of subsequent measurement, financial assets are classified in following categories:

a. Financial Assets at Amortised Cost: -

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate method (EIR). Amortized cost is calculated by taking into account any discount or premium and fees or cost that are an integral part of the EIR. The EIR amortization is included in finance income in the statement of profit & loss. The losses arising from impairment are recognized in the statement of profit and loss.

b. Financial Assets Measured at Fair Value through Other Comprehensive Income (FVOCI):-

Financial assets are measured at fair value through Other Comprehensive Income (OCI)if these financial assets are held within a business model with an objective to hold these assets in order to collect contractual cash flows or to sell these financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial recognition, these assets are subsequently measured at Fair Value. Interest Income under Effective Interest method, foreign exchange gains and losses and impairment losses are recognized in the statement of profit and Loss. Other net gains and losses are recognized in OCI.

c. Financial asset not measured at amortised cost or at fair value through OCI is carried at Fair Value Through Profit and Loss.

d. Equity Investments: -

All Equity investments within the scope of Ind AS 109 are measured at Fair Value. Such equity instruments which are held for trading are classified as FVTPL. For all other such equity instruments, the company decides to classify the same either as FVOCI or FVTPL. The company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

For Equity instruments classified as FVOCI, all fair value changes in the instrument excluding dividends are recognized in OCI. Dividends on such equity instruments are recognized in the statement of Profit or loss

iii. De-recognition of Financial Assets: -

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised when:

- The rights to receive cash flows from the asset have expired, or

The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) the company has transferred substantially all the risks and rewards of the asset, or (b) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

On de-recognition, any gains or losses on all debt instruments (other than debt instruments measured at FVOCI) and equity instruments (measured at FVTPL) are recognised in the statement of Profit and Loss. Gains and losses in respect of debt instrument measured at FVOCI and that are accumulated in OCI are reclassified

to Profit and Loss on de-recognition. Gains or losses on equity instruments measured at FVOCI that are recognised and accumulated in OCI are not reclassified to Profit or Loss on derecognition.

B. Financial Liabilities: -

Financial liabilities and equity instruments issued by the Company are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument.

i. Recognition and Initial Measurement

Financial liabilities are initially recognized when the company becomes a party to the contractual provisions of the instrument. Financial Liability is initially measured at fair value plus, for an item not at fair value through profit and loss, net of transaction costs that are directly attributable to its acquisition or issue.

ii. Classification and Subsequent Measurement

The measurement of financial liabilities depends on their classification, as described below:

Financial liabilities at fair value through Profit or Loss (FVTPL)

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL. Financial Liabilities at FVTPL are measured at fair value and changes therein, including any interest expense, are recognised in Statement of Profit and Loss.

Financial liabilities at amortised cost

After initial recognition, financial liabilities other than those which are classified as FVTPL are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

iii. De-recognition of Financial Liabilities: -

Financial liabilities are de-recognised when the obligation specified in the contract is discharged, cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as de-recognition of the original liability and recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

C. Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount is reported in the Balance Sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

VI. Impairment: -

a. Financial assets: -

In accordance with Ind AS 109, the company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the financial asset measured at amortized cost.

Loss allowances on trade receivables are measured following the 'Simplified Approach' at an amount equal to the Life time ECL at each reporting date. The Company uses a provision matrix to determine impairment loss allowance on the portfolio of trade receivables. The provision matrix is based on its historically observed default

rates over the expected life of the trade receivable and is adjusted for forward looking estimates. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

In respect of other financial asset, the loss allowance is measured at 12 month ECL only, if there is no significant deterioration in the credit risk since initial recognition of an asset or asset is determined to have a low credit risk at the reporting date.

b. Impairment of Non-financial assets: -

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded companies or other available fair value indicators.

c. Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost. Provisions are reviewed at each balance sheet and adjusted to reflect the current best estimates.

VII. Taxation: -

i. Current Tax: -

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using rates that have been enacted or substantively enacted by the end of the reporting period.

ii. Deferred Tax: -

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax asset is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

iii. Minimum Alternate Tax (MAT): -

Minimum Alternate Tax (MAT) paid as per Indian Income Tax Act, 1961 is in the nature of unused tax credit which can be carried forward and utilised when the Company will pay normal income tax during the specified period. Deferred tax assets on such tax credit is recognised to the extent that it is probable that the unused tax credit can be utilised in the specified future period. The net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

VIII. Inventories: -

All inventories are stated at lower of 'Cost or Net Realizable Value'.

- A. Stores and spares, packing materials and raw materials are valued at lower of cost or net realisable value and for this purpose, cost is determined on First in First Out (FIFO) basis. Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. However, the aforesaid items are not valued below cost if the finished products in which they are to be incorporated are expected to be sold at or above cost.
- B. Finished products and Work in Progress are valued at lower of cost or net realisable value and for this purpose, cost is determined on standard cost basis which approximates the actual cost. Cost of finished goods and work in progress includes direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity.
- C. Traded goods are valued at lower of cost and net realizable value. Cost is determined on a weighted average basis.
- D. Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

IX. Employee benefits: -

a. Defined Contribution Plan: -

The Company pays provident fund contributions to publicly administered provident funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plan and the contributions are recognised as employee benefit expense when they are due.

b. Defined Benefit Plan: -

The liability or asset recognised in the Balance Sheet in respect of defined benefit gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the defined benefit obligation denominated in Rs. is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the year in which they occur, directly in other comprehensive income.

Changes in present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in the statement of profit and loss as past service cost.

c. Leave Entitlement: -

Leave entitlement are provided based on an actuarial valuation, similar to that of gratuity benefit. Remeasurement, comprising of actuarial gains and losses, in respect of leave entitlement are recognised in the Statement of Profit and Loss in the period in which they occur.

d. Short-term Benefits: -

Short-term employee benefits such as salaries, performance incentives etc. are recognised as expenses at the undiscounted amounts in the Statement of Profit and Loss of the period in which the related service is rendered.

X. Borrowings and Borrowing costs: -

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

XI. Earnings per Share: -

Basic earnings per share are calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the year is adjusted for events of bonus issue, if any.

For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

XII. Cash Flow Statement: -

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the company are segregated.

XIII. Cash and Cash Equivalents: -

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts, if any as they are considered an integral part of the Company's cash management.

XIV. Foreign currency transactions: -

- A. All transactions in foreign currency are recorded in the reporting currency, based on closing rates of exchange prevalent on the dates of the relevant transactions,
- B. Monetary assets and liabilities in foreign currency, outstanding as on the Balance Sheet date, are converted in reporting currency at the closing rates of exchange prevailing on the said date. Resultant gain or loss is recognized during the year in the Statement of Profit and Loss,
- C. Non-monetary assets and liabilities denominated in foreign currencies are carried at the exchange rate prevalent on the date of the transaction, and
- D. Exchange difference arising on the settlement of monetary items at rates different from those at which they were initially recorded during the year, or reported in previous financial statements, are recognised as income or expenses in the year in which they arise.

XV. Segment reporting: -

Based on " Management Approach "as defined in Ind AS 108 - Operating Segments the chief operating decision maker regularly monitors and reviews the operating results of the whole company as one segment of " Agro - Chemicals ". Thus, as defined in Ind AS 108, the Company's entire business falls under this one operational segment and hence the necessary information has already been disclosed in the Balance Sheet and the Statement of Profit and Loss. The analysis of geographical segments is based on the areas in which customers of the company are located.

XVI. Provisions, contingent liabilities and contingent assets: -

A provision is recognized when the company has a present obligation (legal or constructive) as a result of past event and it is probable that an outflow of resources embodying economic benefits will be required to settle a reliably assessable obligation. Provisions are determined based on best estimate required to settle each obligation at each balance sheet date. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities are disclosed in respect of possible obligations that arise from past events, whose existence would be confirmed by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Contingent liabilities are also present obligations where it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured with sufficient reliability. Contingent Liabilities are not recognized in the financial statements but are disclosed separately.

Contingent assets are not recognised unless it becomes virtually certain that an inflow of economic benefits will arise.

XVII. Leases: -

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease.

Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term unless the payments are structured to increase in line with expected general inflation to compensate for the lessors expected inflationary cost increases.

Overview

Our Company is engaged in the business of manufacturing and marketing a range of agrochemicals. We have a pan-India presence, with integrated operations across research and development, manufacturing, marketing and distribution of a wide range of crop protection chemicals, public health and Animal Health solutions.

Initially we were engaged in synthetic pyrethroids and its intermediates. Synthetic pyrethroids are pesticides derived from naturally occurring pyrethrins and is synthetically made by industrial methods.

We manufacture technical products (active ingredients), intermediate products and formulations. Our pesticides range includes insecticides, herbicides, fungicides and public health products for pest control. We aim to provide innovative products to farmers that enhance farm efficiency and offer better crop solutions. We have products for all kinds of crops, vegetables and fruits. Our products viz Deltamethrin and Alphacypermethrin are now recommended and included in the WHO/FAO specifications. Our company has a well-balanced effluent treatment system for the solid, liquid and gaseous effluents and emission generated from the various processes.

We started our manufacturing activity with production of intermediate product CMAC (Cypermethrinic Acid Chloride). However after initial few years we started manufacturing Technical Products like, Cypermethrin, Alphacypermethrin, Deltamethrin, Permethrin, Lambda cylothrins etc in which CMAC was a main raw material. Therefore over the years we largely stopped selling CMAC in the market and production was primarily used captive consumption for manufacturing Technical Products.

Other than the aforementioned crop protection products, we also produce certain plant growth/spreader products which provide the nutrients to plants for growth. The products include amino acids, gibberellic acid 0.001%L, seaweed extract.

Our major focus is on exports. We have four fully integrated and modern manufacturing facilities with an In-house R&D facility for product development and improvisation. All 4 facilities are in the industrial belt of "Vapi", which is a prime Industrial Township in Gujarat, at a distance of 180 km from Mumbai. These facilities offer a range of Crop Protection chemicals, Public Health and Animal Health solutions. Our Company has a multi-product set up at four different sites/units in Vapi.

UNIT 1: This is our first manufacturing facility with the initial installed capacity of 1320 MTPA of Cypermethric Acid Chloride which is the basic intermediate used in the manufacture of technical grade synthetic pyrethroids. Subsequently the down stream Technical products like Cypermethrin, Deltamethrin, Alphacypermethrin, Lambda Cyhalothrin and Permethrin were established in this plant. Apart from these Pyrethroid products some other Technical products like Acephate, Glyphosate, Temephos, Profenophos, etc. were introduced mostly for catering to our formulated branded products which are distributed all over the country in the Farm sector as well as for export requirements. The current capacity of Unit 1 is 4944 MTPA of Intermediate & Technical products.

UNIT 2: (Export Oriented Unit) It has an installed capacity of 4080 MTPA of Cypermethric Acid Chloride, Cypermethric Acid, Cypermethrin and Alpha Cypermethrin per annum. This plant manufactures high quality derivatives of Cypermethric Acid Chloride as per customer's requirement.

UNIT 3: It is ISO 9001-2008 certified ultra-modern formulation unit, meeting the requirement of the EC (Emulsifiable Concentrate), SC (Suspension Concentrate) and WP (Wettable powders) formulations to cater to the local Indian market as well as for export also offering toll manufacturing facility. Unit 3 produces mostly liquid formulations with filling and packing lines.

UNIT 4: This unit produces only powder formulations and these formulated products are packed in Heranba's Brands, each product in a particular brand name in various pack sizes as per the required dosage for each crop per acre.

Our manufacturing facilities are well equipped with modern equipment, adhering to safety and environmental standards. All the units have fully equipped Quality Control laboratory to check the quality of Input materials, In-Process materials and finished goods. Our manufacturing & packing facilities are fully equipped for:

- Liquid Formulations
- Liquid Packing
- Powder Formulations of SP's & WDP's.
- Powder Packing
- Granular Formulation.
- Granular Packing
- Suspensions concentrate formulation.

Significant Factors Affecting our Results of Operations

Our results operations and financial condition are affected by a number of important factors including:

Industry specific policies

We operate in highly regulated industry. Any changes in any regulation relating to our industry can affect our operations. Our operations are highly impacted by any changes in The Insecticides Act, 1968 and Insecticides Rules, 1971. We, as on date, have the requisite permission to conduct our business. We need to apply and get the requisite permission before we can launch a new product. Thus, our ability to introduce is dependent on the getting the requisite permission in time.

Availability of product

Most of crop diseases/ pest infestation are highly epidemic in nature resulting in excessive demand of a particular plant protection chemical. Thus, our sales are dependent on the availability of products in demand with our dealer and distributors. Any unavailability of our product or our inability to meet the demand for a long period could impact our sales.

Our ability to source the critical raw material

Raw materials account for our major manufacturing cost. Our profitability is dependent on prices at which we procure these Technical products. Our sale is also dependent on our ability to procure these raw materials at the shortest possible notices.

Fluctuating foreign exchange rates

We are subject to currency exchange rate exposures as we transact a significant portion of our business in various foreign currencies, primarily, the US Dollars, Euros and Great Britain Pounds. Foreign exchange fluctuation affects both our revenues and expenditures. To this extent, the revenues and expenditures will be higher or lower depending on the prevalent foreign exchange rates. A depreciating Rupee against the foreign currencies may have an adverse effect on our expenses and an appreciating Rupee may adversely affect our external sales earnings. Our management typically monitors our foreign currency exposure periodically, however, there can be no assurance that the measures adopted by our management would at all times be adequate to cover us from any losses arising out of fluctuations in foreign exchange rates. Also, see, “Risk Factors – *We are subject to risks arising from foreign exchange rate movements*” on page 27 of the Draft Red Herring Prospectus.

Ability to obtain registrations

As a part of our strategy we continue to focus on seeking registrations to increase our portfolio of formulations and technicals. With respect to any new registration, we invest time and money inter alia on identification of generic molecules, registration procedures and fees, trials, various marketing and distribution activities. The launch of a product depends upon our ability to obtain registration in a timely manner or at all as well as on other factors. Accordingly, our profitability, financial condition and market position is dependent on our ability to obtain the necessary registration in a timely manner and to successfully launch and market our products. Also, see, “Risk Factors – *Our ability to introduce new products is dependent on getting the approval for manufacturing and/or selling under Insecticides Act.*” on page 23 of the Draft Red Herring Prospectus.

Seasonal Factor

All the domestic branded products are sold and distributed during the agricultural seasons, Kharif and Rabbi crop periods. Hence these are seasonal products sold mainly during May to September and January to March. In other months there are more of exports. Our agrochemical activities are heavily dependent on the agricultural industry which, in turn, is subject to soil conditions, climatic conditions, rainfall, seasonal and other weather factors, which make the performance of the agricultural sector as a whole or the levels of production of a particular crop relatively unpredictable. Further, global warming and other changes and fluctuations to weather pattern are being witnessed globally which may make it difficult for us to place reliance on weather forecasts and growth opportunities.

Fiscal 2018 compared to Fiscal 2017

Our results of operations for Fiscal 2018 were significantly affected by the following factors:

- 1) Product innovation, branding and distribution: Our Company added Metaphenoxy Benzaldehyde (MPBD), a key intermediate for our own Technical products. This has reduced our cost. We also added technical products like Thiamethoxam and Imidacloprid.
- 2) Implementation of GST has positively affected our business due to input credit availability.
- 3) Good monsoon and Kharif/Rabi season, higher frequency of pest attacks and expansion of cotton acreages worked in favour of agro chemical companies and aided growth.
- 4) With rising pollution concerns the Chinese government has taken strict steps leading to shutdown of many companies and production cuts leading to Chinese export reduction; with reduced imports from China to India, domestic producers got demand improvement. This resulted into prices increase due to demand.

Non-GAAP Financial Measures

These non-GAAP financial measures are not defined under Ind AS and are not presented in accordance with Ind AS. We have included Total Operating Expense, EBITDA and EBITDA margin of our Company because we believe it is an indicative measure of our operating performance and is used by investors and analysts to evaluate companies in the same industry. Bidders can bid at any price within the price band. For instance, assume a price band of ₹20 to ₹24 per share, issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price (₹)	Cumulative Quantity	Subscription
500	24	500	16.70%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.70%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to issue the desired number of equity shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The issuer and the selling shareholders, in consultation with the book running lead managers, will finalise the issue price at or below such cut-off price, i.e., at or below ₹22.00. All bids at or above this issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

e. Alternate Method of Book Building

In case of FPOs, Issuers may opt for an alternate method of Book Building in which only the Floor Price is specified for the purposes of Bidding ("Alternate Book Building Process").

The Issuer may specify the Floor Price in the RHP or advertise the Floor Price at least one Working Day prior to the Bid/Offer Opening Date. QIBs may Bid at a price higher than the Floor Price and the Allotment to the QIBs is made on a price priority basis. The Bidder with the highest Bid Amount is allotted the number of Equity Shares Bid for and then the second highest Bidder is Allotted Equity Shares and this process continues until all the Equity Shares have been allotted. RIBs, NIBs and Employees are Allotted Equity Shares at the Floor Price and Allotment to these categories of Bidders is made proportionately. If the number of Equity Shares Bid for at a price is more than available quantity then the Allotment may be done on a proportionate basis. Further, the Issuer may place a cap either in terms of number of specified securities or percentage of issued capital of the Issuer that may be Allotted to a single Bidder, decide whether a Bidder be allowed to revise the bid upwards or downwards in terms of price and/or quantity and also decide whether a Bidder be allowed single or multiple bids.

SECTION 6: ISSUE PROCEDURE IN FIXED PRICE ISSUE

Applicants may note that there is no Bid cum Application Form in a Fixed Price Offer. As the Offer Price is mentioned in the Fixed Price Offer therefore on filing of the Prospectus with the RoC, the Application so submitted is considered as the application form.

Applicants may only use the specified Application Form for the purpose of making an Application in terms of the Prospectus which may be submitted through the Designated Intermediary.

Applicants may submit an Application Form either in physical form to the any of the Designated Intermediaries or in the electronic form to the SCSB or the Designated Branches of the SCSBs authorising blocking of funds that are available in the bank account specified in the Application Form only ("ASBA Account"). The Application Form is also made available on the websites of the Stock Exchanges at least one day prior to the Bid/Offer Opening Date.

In a fixed price Offer, allocation in the net offer to the public category is made as follows: minimum fifty per cent to Retail Individual Bidders; and remaining to (i) individual investors other than Retail Individual Bidders; and (ii) other Applicants including corporate bodies or institutions, irrespective of the number of specified securities applied for. The unsubscribed portion in either of the categories specified above may be allocated to the Applicants in the other category.

The Issuer is required to receive a minimum subscription of 90% of the Net Offer (excluding any Offer for Sale of specified securities). However, in case the Offer is in the nature of Offer for Sale only, then minimum subscription may not be applicable.

7.1 ALLOTMENT TO RIBs

Bids received from the RIBs at or above the Offer Price may be grouped together to determine the total demand under this category. If the aggregate demand in this category is less than or equal to the Retail Category at or above the Offer Price, full Allotment may be made to the RIBs to the extent of the valid Bids. If the aggregate demand in this category is greater than the allocation to in the Retail Category at or above the Offer Price, then the maximum number of RIBs who can be Allotted the minimum Bid Lot will be computed by dividing the total number of Equity Shares available for Allotment to RIBs by the minimum Bid Lot ("Maximum RIB Allottees"). The Allotment to the RIBs will then be made in the following manner:

- a. In the event the number of RIBs who have submitted valid Bids in the Offer is equal to or less than Maximum RIB Allottees, (i) all such RIBs shall be Allotted the minimum Bid Lot; and (ii) the balance available Equity Shares, if any, remaining in the Retail Category shall be Allotted on a proportionate basis to the RIBs who have received Allotment as per (i) above for the balance demand of the Equity Shares Bid by them (i.e. who have Bid for more than the minimum Bid Lot).
- b. In the event the number of RIBs who have submitted valid Bids in the Offer is more than Maximum RIB Allottees, the RIBs (in that category) who will then be Allotted minimum Bid Lot shall be determined on the basis of draw of lots.

7.2 ALLOTMENT TO NIBs

Bids received from NIBs at or above the Offer Price may be grouped together to determine the total demand under this category. The Allotment to all successful NIBs may be made at or above the Offer Price. If the aggregate demand in this category is less than or equal to the Non-Institutional Category at or above the Offer Price, full Allotment may be made to NIBs to the extent of their demand. In case the aggregate demand in this category is greater than the Non- Institutional Category at or above the Offer Price, Allotment may be made on a proportionate basis up to a minimum of the Non-Institutional Category.

7.3 ALLOTMENT TO QIBs

For the Basis of Allotment to Anchor Investors, Bidders/Applicants may refer to the SEBI ICDR Regulations or RHP/Prospectus. The QIB Category may be available for Allotment to QIBs who have Bid at a price that is equal to or greater than the Offer Price. Allotment may be undertaken in the following manner:

- a. In the first instance allocation to Mutual Funds for up to 5% of the QIB Category may be determined as follows: (i) In the event that Bids by Mutual Fund exceeds 5% of the QIB Category, allocation to Mutual Funds may be done on a proportionate basis for up to 5% of the QIB Category; (ii) In the event that the aggregate demand from Mutual Funds is less than 5% of the QIB Category then all Mutual Funds may get full Allotment to the extent of valid Bids received above the Offer Price; and (iii) Equity Shares remaining unsubscribed, if any and not allocated to Mutual Funds may be available for Allotment to all QIBs as set out at paragraph 7.4(b) below;
- b. In the second instance, Allotment to all QIBs may be determined as follows: (i) In the event of oversubscription in the QIB Category, all QIBs who have submitted Bids above the Offer Price may be Allotted Equity Shares on a proportionate basis for up to 95% of the QIB Category; (ii) Mutual Funds, who have received allocation as per (a) above, for less than the number of Equity Shares Bid for by them, are eligible to receive Equity Shares on a proportionate basis along with other QIBs; and (iii) Under-subscription below 5% of the QIB Category, if any, from Mutual Funds, may be included for allocation to the remaining QIBs on a proportionate basis.

7.5 BASIS OF ALLOTMENT FOR QIBs (OTHER THAN ANCHOR INVESTORS), NIBs AND RESERVED CATEGORY IN CASE OF OVER-SUBSCRIBED ISSUE

In the event of the Offer being over-subscribed, the Issuer may finalise the Basis of Allotment in consultation with the Designated Stock Exchange in accordance with the SEBI ICDR Regulations.

The allocation may be made in marketable lots, on a proportionate basis as explained below:

- a. Bidders may be categorized according to the number of Equity Shares applied for;
- b. The total number of Equity Shares to be Allotted to each category as a whole may be arrived at on a proportionate basis, which is the total number of Equity Shares applied for in that category (number of Bidders in the category multiplied by the number of Equity Shares applied for) multiplied by the inverse of the over-subscription ratio;
- c. The number of Equity Shares to be Allotted to the successful Bidders may be arrived at on a proportionate basis, which is total number of Equity Shares applied for by each Bidder in that category multiplied by the inverse of the over-subscription ratio;
- d. In all Bids where the proportionate Allotment is less than the minimum Bid Lot decided per Bidder, the Allotment may be made as follows: the successful Bidders out of the total Bidders for a category may be determined by a draw of lots in a manner such that the total number of Equity Shares Allotted in that category is equal to the number of Equity Shares calculated in accordance with (b) above; and each successful Bidder may be Allotted a minimum of such Equity Shares equal to the minimum Bid Lot finalised by the Issuer;
- e. If the proportionate Allotment to a Bidder is a number that is more than the minimum Bid lot but is not a multiple of one (which is the marketable lot), the decimal may be rounded off to the higher whole number if that decimal is 0.5 or higher. If that number is lower than 0.5 it may be rounded off to the lower whole number.
- f. Allotment to all Bidders in such categories may be arrived at after such rounding off; and
- g. If the Equity Shares allocated on a proportionate basis to any category are more than the Equity Shares Allotted to the Bidders in that category, the remaining Equity Shares available for Allotment may be first adjusted against any other category, where the Allotted Equity Shares are not sufficient for proportionate Allotment to the successful Bidders in that category. RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for foreign direct investment ("FDI") and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP"), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017 has notified the specific ministries handling relevant sectors.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The DIPP issued the Consolidated Foreign Direct Investment Policy notified by the D/o IPP F. No. 5(1)/2017-FC-1 dated August 28, 2017 which with effect from August 28, 2017 (the "FDI Policy"), consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect prior to August 28, 2017. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with the guidelines prescribed by the SEBI/RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.
